NOTES ON THE RE-ISSUE AND UPDATE OF ENGLISH THROUGH PICTURES

DESIGN FOR LEARNING

These three pocketbooks are the remarkable invention of I. A. Richards and Christine Gibson. Designed for learning English in the quickest and clearest way—through pictures—learners are invited right from the beginning to put widely useful words to work in key sentence patterns where meaning is clearly shown in pictures. Each sentence situation builds to a successful discovery of the next, while confirming mastery of the earlier steps. The simplified black and white drawings allow the learner to focus on the sentence patterns and on success in taking control of language. Comparisons of sentence situations can be made on the individual frames on a page and through a systematic building on all that has gone before. Workbooks included in Books I and II challenge and reinforce growing competencies, while at the same time providing enriched reading and writing well within the learner's grasp. Motivation for learning comes from handling increasingly complex patterns successfully and confidently.

WORDS WITH POWER

The three pocketbooks focus on a small, careful selection of the most widely useful English words put into key patterns. These are words with power to define other words and to improve the possibilities of successful communication in any field of human endeavour. Today these are the words of an English most commonly employed throughout the planet. *Book I* contains a vocabulary of 250 words; an additional 500 word vocabulary is developed in *Book II*. These 750 words are used in *Book III* to build a command of 1000 words which, by their defining power, hold the possibility of understanding another 20,000 words of English. *Book III* invites learners to explore much useful information about the world in which they live while continuing the crucial

process of learning to learn. Words with power become instruments for thinking. The purpose of the pocketbooks is to supply starting points from which learners can go out in different directions as their interests may take them. These are books of beginnings.

TOWARD A WORLD ENGLISH

These materials have been used successfully by millions in more than forty countries. They have been used as a self-teacher by learners of all ages, in schools and in all those diverse settings in the world where a command of English is needed. The materials are the result of extensive research and field testing for over fifty years.

Although many users' first language will be English, millions more will come to English as a second or alternative language. For this group, assistance is needed to move the learner beyond visual comprehension to a command of both spoken and written English. The most effective help will come from a teacher with a command of English who can act as a model and make corrections on pronunciation. Assistance can come as well from audio materials directly matched with the text, with space for the learner to practice speaking.

In updating *English Through Pictures*, the greatest care has been taken at all times to maintain the integrity of the learning system. The updating of this re-issue is to be found mainly in *Book II* and *III*. Dates, prices, population figures, other factual information, and selected illustrations have been updated for current usage. This updating must, of course, be a continuous exercise by the learners. The pocketbooks must become their own, and a base or frame on which future learning can be mounted safely and effectively.

Archie MacKinnon
February, 2005

PREFACE

English Through Pictures Book II adapts the instructional design as in *Book I* of the series, employing all together about 750 highly useful words at work in the essential sentence patterns of the language. A pictorial commentary explains the sentences as they appear, arranged in a double-page display of sentences in situations to invite comparison with one another. Learners quickly get a sense of the new language when they can repeat the sentences after an informant while they look at the depictions.

For study of the written language, a workbook of exercises, graded step by step to the teaching sequence, has been provided to challenge and reinforce the learning of all lexical and structural elements while providing enrichment reading and writing within the learner's reach. The new edition of *English Through Pictures Book I* assembles for the first time in one volume *A First Workbook of English* bound together with the teaching text. *English Through Pictures Book II* and *A Second Workbook of English* follow as the second volume of the new edition.

Field use of the materials—in school and college classrooms, in language laboratories, on educational television, and in special programs for industry, social services and teacher training courses—has established their quick effectiveness. The script and workbook exercises then confirm the oral learning. Verifiable statements of fact about things that can be indicated lead in the later pages into discussion of ideas when words already made clear are brought back to help explain the new. The developing language is self-reviewing.

ENGLISH THROUGH PICTURES
BOOK II

This is a bedroom.
There are two beds in it.

This seat is by the bed.

What is on the seat?
A bag is on the seat.

A woman is by the bed.
Who is she?
She is Mrs. Smith.

What is she doing?

She is putting things into the bag.

What is she putting into the bag?

She is putting Mr. Smith's things into it.

Mr. Smith is going to California. Mr. and Mrs. Smith are in New York State.

He will go by train. This is a train. From New York State to California is a long journey.

What will he take with him to California?

He will take some shirts.

He will take new socks.
New socks have no holes in them.

He will take some socks.

He will not take old socks. Old socks have holes in them.

These trousers have a hole in them.
They are old trousers.

He will take some shoes.

He will put them in a shoe bag.

The shoe bag will keep the other things clean.

The bag is between the shoes and the shirt. The shoes will not make the shirt dirty.

My hands are dirty.

My hands are clean.

This cloth is dirty.

This cloth is clean.

This plate is clean.

This plate is dirty.

His face is dirty.

His face is clean.

The plate is dirty but the cloth is clean.

Now the cloth is dirty but the plate is clean.

This is a basin.

This is warm water in it.

This is soap.

What is she doing?

She is washing her hands with soap and warm water.

Her hands are wet now but they are clean. They were dirty.

What is she doing?

She is drying her hands on a cloth.

Her hands were wet.

Now they are dry. They were dirty. Now they are clean.

What is this?

It is a brush.
It is a toothbrush.

She is putting some toothpaste on the brush.

What is this?

It is toothpaste.

Now she is brushing
her teeth.

Her teeth will be clean.
They will be clean and
white.

What is this?
It is a comb.

And this?

It is a brush.
It is a hairbrush.

She is brushing her hair.

Now she is combing
her hair.

What are these?

They are pins.

One pin is very like another pin.

This pin

is like this pin.

But they are two pins.
They are not the same pin.
They are different pins.

These are three hairpins.
They are different hairpins.

She has a hairpin in her hand.
She is putting it in her hair.

Now it is in her hair. It was in her hand. It is in her hair now. But it is the same hairpin.

He is brushing his hair. He does not put pins in his hair.

Mrs. Smith put some shirts and some socks and shoes (in a shoe bag) and a comb and brushes and toothpaste and soap and a wash cloth in Mr. Smith's bag.

She put all these things in his bag.

Mr. Smith will go to the station in a taxi.

This is a taxi.
Mr. Smith is getting into it.
He has his bag with him.

This is the station.

The taxi is in front of the station.
The time is 8:00.
The train will go at 8:30.

Mr. Smith is getting out of the taxi.

Now he is going into the station.

This is the waiting room
in the station.

Those men and women
on the seats in the
waiting room are
waiting. They are waiting
for their trains.

Here is a train.

This is the engine of
a train.

This is the
bell on the
engine.

These are rails. The train
goes on these rails. It is a
railroad train.

Here is the ticket office in
the station.

Mr. Smith got his ticket
here.

Here is his ticket. He gave \$841.80 for his ticket.

These are tickets.

How much was his ticket for the journey to Los Angeles?

It was eight hundred and forty-one dollars and eighty cents (\$841.80).

How long is the journey?

Four days.

Which days will he be on the train?

He will be on the train

Sunday, Monday,

Tuesday, Wednesday.

The other days of the

week are Thursday,

Friday, Saturday.

How much money did he

take with him for his

journey? He took five

hundred and nineteen

dollars (\$519.00).

Much money: \$5000

Little money: \$5

Mr. Smith has friends in California.

Mr. Smith His friends

Here are his friends. He and his friends are shaking hands.
(See page 134.)

His friends were waiting for him at the station.

They say, "Did you have a good journey?" He says, "Yes, but it was a long journey."

His friend says, "Let me have your bag, please."
He will go with his friends to their house.

This is a letter: *a*.
 These are letters: *a, b, c*.
 This is a word: *man*.
 Three letters make the
 word *man*.
 The man is writing a
 letter.
 He is writing on paper
 with a pen.

This is the letter.
 It is in Mr. Roe's writing.
 Mr. Roe will send the
 letter to Mr. Doe.

Here is the letter ready
 for the post.
 Here is the stamp.

Mr. Doe's name and
 street and town are on
 the letter.
 Mass. is short for
 Massachusetts.
 Middlefield is in
 Massachusetts.

This is the back of the
 letter.
 Mr. Roe's name, and the
 town where he is living

are on the back of the
 letter.
 Me. is short for Maine.
 Bar Harbor is in Maine.
 Massachusetts and
 Maine are two states of
 the United States of
 America.

Mr. Smith is writing a card to Mrs. Smith. He is in San Francisco. On one side of the card is a picture of the harbor. Here is the picture. This is a picture postcard.

Here is the other side of the card. Mr. Smith is putting Mrs. Smith's name on it.

He will put her street under the name. He will put her town under the street. Then he will put the state where her town is.

Now the card is ready for the post.

There is a stamp on the card. Mrs. Smith's name and street and town are on the right hand side of the card. Mrs. Smith's town is in New York State.

Mr. Smith is taking the card to the Post Office. He is going up the steps.

He will put the card in the letter box on the wall of the Post Office.

He is sending the card to Mrs. Smith.

This morning Mrs. Smith got the card which Mr. Smith sent to her from San Francisco.

She is reading it now. She is reading: "I had a good journey"

Reading and writing are parts of our education.

We get a great part of our education at school. These boys and girls are at school.

The teacher is teaching them.

Mrs. Smith is sending Jane and Tom to school.

They will be at school before nine. They get good teaching at school.

At school, Tom and Jane are learning.

They were reading and now they are writing.

Tom is writing the word *learning* on the board. The teacher is teaching him the word *learning*.

Now Tom and Jane are back from school. Jane is reading a story.

It is eight-thirty.

Tom is writing at the table.

Tom's dog is at his feet.

Mrs. Smith is reading the newspaper.

Tom and Jane are getting a good education. They get some of it at school, and they get some of it from their mother and father.

Mrs. Smith is taking a look at Tom's work.

It is good work.

Now Mrs. Smith is writing a letter to Mr. Smith. She sends love from Tom and Jane to their father.

She will send the letter to Mr. Smith.

She has the letter in her hand.

Now she is sending the letter.

She sent the letter.

QUESTIONS

a What are these?

What is this boy doing?

b What are these?

What is the man doing?

c What are these?

What is the girl doing?

d What is this?

What is the woman doing?

The answers are on page 28.

QUESTIONS

- a** On page 13, where did Mr. Smith get his ticket?

- b** How much was the ticket?

- c** How long was the journey to Los Angeles?

- d** Did he go in an airplane?

- e** What did his friends say to him when they saw him?

- f** What did he say on the card which he sent to Mrs. Smith?

- g** What are Tom and Jane learning at school?

- h** What did Mrs. Smith send to Mr. Smith from Tom and Jane?

The answers are on page 28.

This is a plate.
The plate is round.

This is an orange.
The orange is round.

The face of the
clock is round.
The hands of
the clock go round.

This is the earth.

The earth is round.

This is the moon.

The moon is round.

This is the sun.

This is the
sky.

This is a cloud in the sky.

This is the earth.

The sun comes up in
the East.

It comes up every
morning.

The sun goes down in
the West.

It goes down
every night.

What is the time?
It is five-eight A.M.

The sun is coming up
now at five-eight
(5:08) A.M.

What is the time? It is
five-twenty (5:20) P.M.

The sun is going down
now at five-twenty
(5:20) P.M.

Yesterday the sun came up at five-seven (5:07) A.M. and went down at eight-nineteen (8:19) P.M. Today the sun came up at five-six (5:06) A.M. and will go down at eight-twenty (8:20) P.M. Tomorrow it will come up at five-five (5:05) A.M. and will go down at eight twenty-one (8:21).

This is night.

This is the earth.
That is a star.

This is morning.

The sun is coming up.

North, South, East, West
are four directions.

There are twenty-four
hours in one day.
Twenty-four hours make
one day.
Two and two make four.
Three and five make
eight.
What do five and six
make?
Do they make ten, or
eleven, or twelve?
That is a question.
The answer is "Eleven."

Say these numbers: 1, 2,
3, 4, 5, 6, 7, 8, 9, 10, 11, 12.

What number comes
after 12?

Thirteen.

What comes after 13?

Fourteen.

What comes after 14?

Fifteen.

What numbers come
after 15?

Sixteen 16

Seventeen 17

Eighteen 18

Nineteen 19

Twenty 20

Twenty 20 Twenty-one 21

Thirty 30 Thirty-one 31

Forty 40 Forty-one 41

Fifty 50 Fifty-one 51

Sixty 60 Seventy 70

Eighty 80 Ninety 90

A hundred 100

A hundred and one 101

A thousand 1000

A million 1,000,000

WHAT ARE THESE THINGS?

The answers are on page 29.

QUESTIONS

- a** What do seven and eleven make?
What do twenty and forty make?
What do thirteen and thirty make?
What do two hundred and three and three hundred and four make?
- b** Where does the sun come up and where does it go down?
Does day come after night?
Does night come after day?
- c** This is a letter.
Where do we put Mr. Green's street and town and state on the letter?
- d** Tom's work at school is learning.
He is a learner.
What is the teacher's work?

The answers are on page 29.

Answers to questions on pages 20–21

Page 20

- a** They are shoes.
He is putting his shoes on his feet.
- b** They are shirts.
He is putting his things in his bag.
- c** They are toothpaste and a toothbrush.
She is brushing her teeth.
- d** It is soap.
She is washing her hands.

Page 21

- a** He got his ticket at the ticket office in the station.
- b** The ticket was \$841.80.
- c** The journey was four days long.
- d** No. He did not go in an airplane. He went in a train.
- e** They said, "Did you have a good journey?"
- f** He said, "I had a good journey and will send you a long letter tomorrow. Love. John."
- g** They are learning reading and writing at school.
- h** She sent love from Tom and Jane

- a** Eighteen. Sixty. Forty-three. Five hundred and seven.
- b** The sun comes up in the East and goes down in the West.
Yes, day comes after night.
Yes, night comes after day.
- c** We put his street under his name and we put the name of the town under the name of the street. And under that we put the name of the state.
- d** The teacher's work is teaching.

This boy's name is Tom.

This girl's name is Jane.

Tom is making something.

Jane is saying, "What are you making, Tom?"

Tom is saying, "I am making a house."

This is a box.

This is one side of the box.

This is the opposite side of the box.

This is the front of
the box.

And this is the back of
the box.

This is the floor of
the box.

And this is the cover of
the box.

Now this side will be one wall of the house.

I will put a window in here.

This will be the opposite wall of the house.

I will put another window in this opposite wall.

The front of the box will be the front of the house.

I will put a step under the door.

This is a step.

These are steps.

Jane said, "A house has a roof. Will you put a roof on the house? How will you make the roof?"

I will make the roof from the cover of the box.

No. There is not enough wood in the cover.

How long is the cover?

How wide is the cover?

I am measuring it.

The cover is not long enough.
It is not wide enough.

The roof is like this.

Here is a wider bit of wood.

It is wider and it is longer.

I will make the roof from this other bit of wood.

I will make a cut in this wood.

I will make a cut at this angle.

A cut.

This is an angle.

This is an angle.

This is a right angle. This is another right angle.

"What are you doing, Tom?"

"I am measuring the wood."

It is good wood.

This is a measure.

We get wood from trees.

These are trees.

Some wood is hard.

Some wood is soft.

This is a tree.

We get hard wood from some trees.

They give hard wood to us.

Other trees give soft wood to us.

Now I am making a cut
at this angle in this bit of
wood.

The blade is going
through the wood.

This is my knife.

This is the blade of my
knife.

I am making a line on
the wood.
I am making a line with
a pencil.

This is the pencil.

This is the line.

"Keep on the line when you are cutting. Don't go off it."

Oh! You are going off the line!
The cut is not on the line

That is bad! The cut is off the line.

You did that! You gave a push to the table.

No, I did not! Your knife went off the line.

Yes. It went off the line.

Do it again!

It's not very bad.

Here is the line.

And here is the cut.

a straight line

a bent line

Tom is making another attempt.

That is better. The cut is straight. The blade of the knife went straight. Good!

Now I have these two bits of wood.

I will put them together like this.

There is the roof of the house.

Now I will put the two parts of the roof together with nails.

I will make a hole through this part of the roof into the other part of the roof.

Tom is making the holes for the nails.

Now he is putting the nails in with his hammer.

Now the two parts of the roof are together.

Oh yes,
it is very
strong.

Is it
strong?

Is this line long?

This line is longer.

Is this bit of wood
strong?

This bit of wood
is stronger.

Here are the supports for
the roof.

Will you put another
support for it in
the middle?

Where?

In the middle.

Yes, that is better.

This is a straight line

This is one
end of it. This is the
other end.

This
is the middle
of it.

This is a bent line.

That will be better.
That will make the roof
stronger.

Jane is making something.

What are you doing, Jane?

I am making a coat and trousers.

Here are the trousers.

Here is the coat.

"Has your coat a collar?"

"Yes, it has. Here is the collar."

This is the front of the coat.

Here is the collar of the coat.

This is the back of the coat.

This is one side of it.

This is one pocket of it.

Here is the other side.

This is the right side.

This is the left side.

These are the arms of the coat.

These are the buttons of the coat.

The right arm.

The left arm.

This is a button.

This is a needle.

This is a button-hole.

This is thread.

What are you doing with
your needle now?

And I am making the
button-holes.

I am putting this button
on the coat.

The girl will put the end of the thread through the needle.

She has the needle in the fingers of one hand and the thread in the fingers of the other hand.

This is the end of the thread.

This is the hole in the needle.

It is the eye of the needle.

The end of the thread is not going straight. It is not going through the hole in the needle.

The thread did not go through the needle. It is not through the hole in the needle now.

It is on one side of the needle.

It is on this side of the needle.

Now the girl is doing it again.

Is the end of the thread through the hole?

No, it is not.

It is on the other side of the needle.

The girl is making another attempt. This time the thread will go through the hole. The end of the thread is straight.

It went through. The girl is taking the end of the thread in her fingers. The thread is through the needle.

Where are your scissors?
Here they are.

This blade
is narrow.

This blade
is wide.

Narrow?
This is a narrow street.

This is a wide street.

These trousers
are wide.

These trousers
are narrow.

QUESTIONS

a These are two walls.

Which of them is thicker? Is wall *a* or wall *b* thicker?

b These are two cuts.

Which of them is wider? Is cut *a* or cut *b* wider?

c These are two nails.

Which of them is longer?

d Which of these two men is stronger?

e Which of these two pencils is shorter?

f Which of these two cards is longer?

Which is wider?

g Which of these three angles is a right angle?

h Which of these things are broken?

This page is page 51. The answers are on page 54.

QUESTIONS

a What is he doing?

b What is she doing?

c What is he doing?

d What is he doing now?

e What is he doing?

f What is she doing?

g What is she doing now?

h And what is she doing now?

This page is page 52. The answers are on page 54.

 QUESTIONS

A What are these things?

C Which of them go on their feet?

B Which of them go through the air?

D Which of them go on the water?

This page is page 53. The answers are on page 54.

Answers to questions on pages 51-53

Page 51

- a** Wall *b* is thicker.
- b** Cut *b* is wider.
- c** Nail *a* is longer.
- d** The man who is on his feet is stronger.
- e** Pencil *b* is shorter.
- f** Card *b* is longer.
Card *a* is wider.
- g** Angle *c* is a right angle.
- h** The cup, the hammer, and the plate are broken.

Page 52

- a** He is going up the steps.
- b** She is going down the steps.
- c** He is putting a nail in with a hammer.
- d** He is taking a nail out with a hammer.
- e** He is measuring a box.
- f** She is putting a thread through the hole in a needle.
- g** She is taking the end of the thread between her finger and thumb.
- h** She is putting a button on with a needle and thread.

- C** Pigs, sheep, horses, cows, dogs, birds, and goats go on their feet.
- D** Ships and some birds go on the water.

The earth goes round in twenty-four hours.

There are twenty-four hours in every day. The sun comes up and goes down every day because the earth is turning round.

The earth goes round the sun in a year.

There are three hundred and sixty-five days in a year. Three hundred and sixty-five days make a year.

There are seven days in a week. Seven days make a week. Here are the names of the days of the week: Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday. Monday is before Tuesday. Tuesday is after Monday.

There are thirty-one or thirty or twenty-eight days in a month. Here are the names of the months:
 January (31)
 February (28)
 March (31)
 April (30)
 May (31)

June (30)
 July (31)
 August (31)
 September (30)
 October (31)
 November (30)
 December (31).
 January is before February ...
 February is after January...

These are the winter months: December, January, February.

These are the summer months: June, July, August.

These are the spring months: March, April, May.

These are the fall months: September, October, November.

In the North, the earth is cold in the winter.

The wind is cold.

Snow comes down from the sky.

There are no leaves on the trees.

There is ice over the water.

The days are short.

In the North, the earth and the air are warm in the summer.

There are leaves on the trees.

The days are long.

There is no ice or snow.

In the spring the leaves come out on the trees.

Plants come up out of the earth, and flowers come out on the plants.

In the fall, the leaves come down from the branches of the trees. Fall is the time of the fall of the leaves. They are coming down. They are falling.

In the spring the days get longer. Every day is longer than the day before it. In the spring today is longer than yesterday.

In the fall the days get shorter. Every day is shorter than the day before it. In the fall tomorrow will be shorter than today.

This line  is longer than  this line.

The time between three and four is shorter than the time between three and five.

One hour is a shorter time than two hours.

Fifteen minutes make a quarter of an hour. 

Thirty minutes make half an hour. 

Forty-five minutes make three-quarters of an hour. 

Which is shorter—a quarter of an hour or half an hour?

Which is shorter—the minute hand or the hour hand of a clock?

Twelve inches make a foot.

This is a foot.

How long is it?
It is ten inches long.

This is an inch.

The distance from A to B is one inch.

Half an inch is a shorter distance than an inch.

A quarter of an inch
Three-quarters of an inch

Three feet make a yard.

This is a yard measure

There are thirty-six inches in a yard.

These are feet.

They are not twelve inches long.

Seventeen hundred and sixty yards (1760) make a mile.

In half a mile there are eight hundred and eighty yards.

Miles, yards, feet, and inches are measures of distance.

What are this man and this girl doing?

They are taking a walk.

In one hour he will go two miles, and she will go four miles.

He is slow. She is quick.
She is quicker than he is.
He is slower than she is.

This is a train.

Trains are quicker than horses or men.

This is an airplane.

Airplanes are quicker than trains or horses or men.

This baby is one year old.

This boy is ten years old.

This man is thirty years old.

This old man is ninety years old.

That is a stick in his hand.

The baby is very young.

How old is he?

He is one year old.

The old man is very old.

How old is he?

He is ninety years old.

This box is four inches long and three inches wide and two inches high.

How long is it?

It is four inches long.

This room is twenty feet long and sixteen feet wide and twelve feet high.

How high is the room?

It is twelve feet high.

This is a short coat.

This is a longer coat.

This is the longest coat of the three.

This is a thin book.

This is a thicker book.

This is the thickest book of the three.

This is a narrow street.

This is a wider street.

This is the widest street of the three.

Which is the narrowest street of the three?

This is a dirty face.

This is a cleaner face.

This is the cleanest face of the three.

Which is the dirtiest face?

Glass is
harder than
wood

Wood is harder than
bread.

Bread is harder than
butter.

Which is the softest
of these?
Which is the hardest?

This man is
stronger than
this boy.

The boy
is not as
strong as
the man.

He is not as old as
the man.

The baby is not as old as
the boy or as strong as
the boy.

This man is older
than this boy.

The boy is
older than
this baby.

Which of them
is the oldest?
The baby is the
youngest. He is
very young.

This line

is as long as this line.

The two lines are
equal (=).

This line

is not as long as
this line.

They are not equal.

A train may go one hundred (100) miles in an hour.

An airplane may go six hundred (600) miles in an hour.

Trains and airplanes are different sorts of transport.

What are some other sorts of transport?

Ships are another sort of transport.

How far may a quick ship go in an hour?

A quick ship may go thirty miles in an hour.

Automobiles and buses are other sorts of transport.

Airplanes, trains, ships, automobiles, buses and horses and carriages take us from one place to another.

We may go on our feet
from one place to
another.

When we go on our feet,
we are walking.

Some places are near to
one another.

Some places are far from
one another.

Or we may go in a train
or in a ship or in an auto-
mobile or in an airplane
or on a horse or in a bus.

Places in Washington are
near to one another.

The distance from one
place to another is not
far.

But some places in the
United States are far
from one another.

This is a map of North America.

These are mountains.

These are railroads.

These are roads.

These are rivers.

Men and women go up mountains.
Mountains are high.

Trains go on railroads.

A road

A river

An island

Ottawa, Washington, Mexico City, New York, and Los Angeles are towns.

This is a town.

The government of Canada is in Ottawa.

The government of the United States is in Washington.

The government of Mexico is in Mexico City.

How far is Ottawa from Mexico City?

The distance from Ottawa to Mexico City is about twenty-three hundred miles.

How far is New York from Los Angeles?

The distance between New York and Los Angeles is about twenty-five hundred miles.

How far is the mouth of the Mackenzie River from the mouth of the Mississippi?

The distance is about 3300 miles.

The mouth of a river is the place where it goes into the sea.

This is the earth. We are seeing it from the north.

There is more land than water on this side of the earth.

This is the earth. We are seeing it from the south.

There is more water than land on this side.

This is the moon.

The moon goes round the earth in a month.

Do we ever see the other side of the moon?

No.

We see the same side of the moon at all times.
Why?

We see the same side at all times because the moon is turning round.

The moon

The earth

It is going round the earth and it is turning round itself.

It keeps the same side to the earth.

We see the same side of the moon at all times. Sometimes we see it like this.

One half of the moon is dark.

The other half is bright.

This is a half moon.

Sometimes we see the moon like this.

This part of the moon is dark.

This part of it is bright.

This is a quarter moon.

Sometimes we see it like this.

This is a new moon.

This is a new hat.

This is an old hat.

And sometimes we see it like this.

This is a full moon.

This glass is full.

This glass is not full.

These are the changes of the moon.

Full, 

three-quarters, 

half, 

a quarter, 

new. 

But at all times we see the same side of the moon.

Change? What is that?

Here is a change in the direction of this line.

And here is another change.

Here are two trains.
The man was in this train.
He is going to the other train.
He is making a change.
He is changing trains.

The potatoes were hard.

After a time they were soft.

There was a change in the potatoes.

This water was cold.

Now it is boiling.
That is a change.

There was a change in the water.

In the summer the leaves are on the trees.

In the fall the leaves come down off the trees.
That is a change.

I took a newspaper and gave a dollar (\$1) to the man.

He took the dollar and he gave

a quarter (dollar)

and ten cents

and five cents.

This is the money which he gave to me with the paper.

The price of the paper was sixty cents. I got the paper and forty cents from him.

$$\begin{array}{r} \$1.00 - 100 \text{ cents} \\ \text{Paper} - \underline{60 \text{ cents}} \\ \hline 40 \text{ cents} \end{array}$$

That money was my change.

I had a dollar.

After I got the paper I had the paper and forty cents.

I did not have the dollar.

That was a change.

QUESTIONS

- a** Is the boy nearer to the woman than the girl is?

Is the girl nearer to the boy than to the woman?

- b** Which of these two is farther from the tree?

Is the boy farther from the tree than from the girl?

- c** Which of these two glasses is full of water, the glass to the right or the glass to the left?

- d** Is there more land than water on the south side of the earth?

This page is page 72. The answers are on page 74.

QUESTIONS

a Which of these is a half moon, which is a full moon, which is a quarter moon, and which is a new moon?

b I got a book. I gave ten dollars to the man in the bookstore. He gave me the book and fifty cents. What was the price of the book? How much was the book? How much change did he give me?

c How far may a quick train go in an hour? How far may you go on your feet in an hour, four miles or forty?

d What are some different sorts of transport? Which is the quickest sort of transport?

The answers are on page 74.

Answers to questions on pages 72-73.

Page 72

- a** No, the girl is nearer to the woman. Yes, the girl is nearer to the boy than to the woman.
- b** The girl is farther from the tree. Yes, the boy is farther from the tree than from the girl.
- c** The glass to the left is full of water.
- d** No. There is more water than land on the south side of the earth.

Page 73

- a** C is a half moon; B is a full moon; D is a quarter moon; and A is a new moon.
- b** The price of the book was \$9.50. It was \$9.50. He gave me 50 cents change.
- c** A quick train may go a hundred miles in an hour. I may go four miles but not forty.
- d** Ships, trains, buses, and airplanes are different sorts of transport. The airplane is the quickest of these.

The distance through the earth from North to South is seven thousand nine hundred (7900) miles.

The distance round the earth is twenty-four thousand nine hundred (24,900) miles.

How far is the moon from the earth?

It is two hundred and forty thousand (240,000) miles from the earth.

How far is the sun from the earth?

The distance of the sun from the earth is ninety-three million (93,000,000) miles.

What is that in your hand?

It is a ball.

The ball is small.

What is the size of the sun?

It is 864,000 miles through from one side to the other.

What is that in the sky?

It is the sun.

The sun is great.

The sun is a great ball of fire.

What is the size of the moon?

It is two thousand one hundred and sixty (2160) miles through from one side to the other.

Is the moon smaller than the earth?

Is the earth smaller than the sun?

Is the sun greater than the moon?

The moon is near the earth.
The earth is far from the sun.

New York is near Washington.

San Francisco is far from Washington.

Are the stars smaller than the sun?

No. Some of the stars are much greater than the sun.

Are they nearer than the sun?

No, they are much farther than the sun.

How far from the earth is the nearest star?

It is over four light-years from the earth.

What is a light-year?

It is the distance which light goes in a year.

This is a flame.
It sends out light.

The sun sends out light.
The light goes out from
the sun in every
direction.

A light-year is
6,000,000,000,000 miles.

The nearest star is over
four light-years from the
earth.

Light goes 186,300 miles
in a second.
How far does it go in a
year?

It goes about
6,000,000,000,000 miles
in a year.

The nearest star is
25,000,000,000,000 miles
from the earth.

The nearest stars are very
far from us.

Some of the stars are
very much farther.

The farthest stars are
thousands of light-years
from us.

The sun sends its light out in every direction.

These are four directions.

Up and down are two other directions.

This boy has six apples in his hands.
He is on a branch of a tree.

He will send the six apples in different directions.

He sent one apple north, another apple south, another east, and another west.

He sent another apple down.
He sent five apples in five directions.

He sent the last apple up.
But then it came down.
Why did it come down?

The first apple went
north and then it came
down. The other apples
went south and east and
west and then they all
came down to the earth.

They all came down to
the earth?
Why did they come
down?

The first apple...
The last apple...
What is "the first"...?
What is "the last"...?

Here are three dogs.
Which is the first dog?
Which is the last dog?
The other dog is the dog
in the middle.
He is between the first
dog and the last dog.
Two of the dogs are
white.
The other dog is black.
The dog in the middle
is black.

These men are in a line.
This is the first man.

This is the last man.

Here are two bodies.
 One is a great body.
 It is the earth.
 The other is a small body.
 It is an apple.
 The apple is coming
 down to the earth.
 Why?

It is coming down
 because there is an
 attraction between the
 two bodies.
 The attraction between
 them makes the apple
 come down.

All bodies which have
 weight have an attrac-
 tion for one another.

Here are two bodies.
 These are springs.

Which body has the
 greater weight?

Here are two men.

This man
 is thin.

His body
 is thin.

This man
 is fat.

His body
 is fat.

Which man's weight is
 greater?

This is a scale.

A scale is an instrument for measuring weight.

Which man's weight is greater?

They are on the scale.

The weight of the thin man is 100 pounds.

The weight of the fat man is 200 pounds.

Clocks are instruments for measuring time.

This is a watch.

Watches and clocks are instruments for measuring time.

This is an instrument for measuring heat.

A yard measure is an instrument for measuring distance.

Inches, feet, yards, metres, and miles are measures of distance.

All bodies have an attraction for one another.

If the bodies are great the attraction between them is great.

If the bodies are small the attraction is small.

If the bodies go farther from one another the attraction gets smaller.

Distance	Attraction
1	1
2	1/4
3	1/9
4	1/16
5	1/25

Here is a light.

It sends out light in every direction.

← Here is a square.

I put the square at different distances from the light. At distance 1, it gets all the light which is going out between the lines. At distance 2, it gets one-fourth of the light. At distance 5, it gets one twenty-fifth. It is the same with the attraction between bodies.

What keeps the moon up
in the sky?

Why does not the moon
come down?

The moon is a great
body.

Its weight is great.

The earth is a great body.
Its weight is eighty-one
times the weight of the
moon.

Two times three is six.
 $2 \times 3 = 6$

The moon and the earth
are not very far from one
another.

The distance between
them is about two
hundred and thirty-nine
thousand (239,000)
miles.

Because they are great
bodies and near one
another, the attraction

between the moon and
the earth is very great.

Why does the moon not
come down to the earth?

That is a question.

The answer is: "Because it is going round the earth."

This is a cord in my hand. The cord has a weight at its end.

The weight is hanging down on the cord which is in my hand.

I make the weight go round on the cord.

I keep the end of the cord in my hand.

Now I let the end of the cord in my hand go.

The weight goes off in a straight line. It takes the cord with it.

The pull of the cord in my hand kept the weight from going off in a straight line.

The attraction between the earth and the moon keeps the moon from going off in a straight line.

The moon goes round and round the earth... month after month

It does not get farther from the earth,

or nearer to the earth.

It keeps about the same distance from the earth.

Here is Sir Isaac Newton,
the great man of science.
Newton had a great
mind.

He is under an apple
tree.

It is the year 1666.

Those are apples which
are over his head.

The seat has three legs.

Here is an apple which
was over his head. The
apple was on a branch
of the tree.

The apple came off the
branch. It came down.

It came down on
Newton's head.

That is the story.
The story may be true or
it may not be true.

But that is the story. It
comes from the great
writer, Voltaire.

True?
 $2 + 2 = 4$. That is true.
 $2 + 2 = 5$. That is not true.
It is a false statement.
"Apples are fruit."
That statement is true.
"Apples are animals."
That statement is false.
False = not true
Short = not long
Shut = not open

In this story the fall of
the apple on Newton's
head was the cause of
the idea.

The blow which the
apple gave to Newton's
head gave an idea to
Newton.
It made a question come
into Newton's mind.

This was the question:
"Have the fall of the
apple and the motion of
the moon the same
cause?"

Here is a ball. It is hanging on a cord.

I will give a blow to the ball with this stick.

I gave the blow. Now the ball is in motion. What was the cause of the motion? The blow of the stick was the cause of the motion.

The ball was not in motion before the blow. It was at rest. It was hanging on the end of the cord.

The blow was the cause of the motion.

After the blow the ball was in motion. The motion came from the blow. The motion was the effect of the blow.

Which of the statements on this page are true and which are false? Put a T before the true statements and an F before the false.

- a**
1. The earth is in motion.
 2. The earth is turning round.
 3. The earth goes round the moon.
- b**
1. The moon is greater than the sun.
 2. The sun is colder than the moon.
 3. The moon goes round the earth.
- c**
1. The attraction between two bodies gets greater as they go farther from one another.
 2. The attraction between two bodies is greater when they are nearer.
- 3.** When two great bodies are near one another the attraction between them is small.
- d**
1. When a blow puts a ball in motion, the blow is the cause of the motion.
 2. When a blow puts a ball in motion, the motion is the effect of the blow.
 3. When a body is in motion it is at rest.

.....
The answers are on page 92.

QUESTIONS

Milk comes from a cow. Heat comes from the sun, or a fire. Where do these things come from?

a potatoes

d letters

g oranges

b cheese

e flowers

h meat

c light

f snow

i eggs

Which of these things have a face?

a man

an icebox

a goat

a river

a dog

a clock

a bird

a table

a bone

a tree

an airplane

Which of them have a mouth?

Which of them have hands?

Which of them have a door?

.....
The answers are on page 92.

QUESTIONS

- a** We put a bottle on a shelf.
Which of these things may we put on a shelf:
a book, a mountain,
a cup, a box, a star,
a clock, a horse,
a distance, a plate,
a bus, a river, a house,
a spoon, a garden?
- b** We put potatoes in a pot.
Which of these things may we put in a pot:
water, windows, food,
streets, tables, milk,
soup, trains, salt, colors,
eggs, wood, ideas?
- c** We put money in our pockets.
Which of these things may we put in our pockets:
pipes, education,
letters, pencils, offices,
islands, maps, hands,
governments, buttons,
watches, distance,
balls, roofs, knives?
- d** We put our hats on.
Which of these things may we put on:
feet, boots, seats,
gloves, shirts, walls,
directions, coats,
buildings, soap,
scissors, collars, locks,
socks, trousers,
branches, trays, shoes,
apples?

.....
The answers are on page 92.

Answers to questions on pages 89-91.

Page 89

- | | | | |
|---------------|---------------|---------------|---------------|
| a 1. T | b 1. F | c 1. F | d 1. T |

|---|---|
| a a book, a cup, a box, a clock, a plate, a spoon. | c pipes, letters, pencils, maps, hands, buttons, watches, baits, knives. |
| b water, food, milk, soup, salt, eggs. | d boots, gloves, shirts, coats, collars, socks, trousers, shoes. |

What is this?

The man has an umbrella
in his hand.
It is open.
He has it over his head.
Why?

Because it is raining.
Water is coming down
from the sky.
The water is rain.
Rain is coming down.
Rain is falling.
It is raining.

The rain made the man
put up his umbrella.
That was the effect of
the rain.
Today is Monday. 
Yesterday (Sunday)
the sun was bright.
There were no clouds in
the sky.

Today there are dark
clouds in the sky.
They come between us
and the sun.
The dark clouds keep the
light of the sun from us.

The rain comes down
from the clouds on me.
It comes down on my
head.

The rain comes down
from the clouds on us.
It comes down on our
heads.

Why is it raining today?
Yesterday the weather
was good.
The sun was bright.
The air was warm.

Today the weather is
bad.
The rain is coming down.
The wind is blowing.
It is cold and the rain
makes us wet.

Tomorrow the weather may be worse.
It may be very cold.
All the water may be ice.
Snow may be coming down making everything white.
Will tomorrow be like this?
Is this winter or summer?

Or tomorrow the weather may be better.
The sun may be bright again.
The air may be warm again and the streets
may be dry again.
Will tomorrow be like this?

What are the causes of these changes in the weather? Change? What is that? (See page 70.)

Here is a change in the direction of the line.

This bird was wet. It was in the rain.

Now it is dry.

That is a change. It was wet. It is dry.

What is the cause of these changes in the weather?

Good	Bad
Dry	Wet
Warm	Cold
Weather	

There is not one cause only. There are numbers of causes. Changes in the heat which comes to us from the sun are one cause of changes of weather.

Why are there these changes of weather?

The amount of heat which the earth gets from the sun is different from time to time. There are changes in the sun.

If you take a look at the sun through a bit of dark glass you may see small marks on the face of the sun.

Amount? One dollar is a small amount of money. A million dollars is a great amount of money.

A drop of rain is a very small amount of water.

There is a small amount of water in this glass.

There is a great amount of water in the sea. This is the sea. Those are ships which are on the sea.

Changes in the heat which comes to the earth from the sun are one cause of changes in the weather.

This discovery is new. A man of science made the discovery in 1944.

He made it by measuring the heat which comes to the earth every day from the sun.

The amount of heat is different from day to day.

On some days the sun sends more heat to the earth. On other days it sends less heat to the earth.

There is more water in this glass than in that.

More

Less

We are making new discoveries every day. Columbus made the discovery of America in 1492.

Columbus came to America in his ship in 1492.

What were some other great discoveries?
One of them was fire.

Fire is of very great use to us. It gives us heat.

Another great discovery was the wheel.

Wheels are round.

They go round.

A cart

They are of very great use to us.

Another great discovery was clothing.

What are these?
These are some other sorts of clothing.

A skirt

A shirt

The making of cloth was a great discovery. This is how we make cloth.

These are threads. (See page 47.)

They go across from one side to the other of a frame.

These are other threads.

They go across the first threads.

They go under and over them.

We make threads from wool and cotton and silk.

We get wool from sheep.

This is cloth.

This is a roll of cloth.
We make clothing of cloth. We make cloth of threads.

Wool is the thick warm hair of sheep.
We take the wool off the sheep's back with scissors.

We make threads from the wool by twisting the hairs round and round.

That wheel is going round.

It is giving a twist to the thread.

It is twisting the thread.

We get cotton from the cotton plant.

Cotton is the soft white hair round the seeds of the plant.

These are different sorts of seeds.

Plants come up from seeds which come from other plants of the same sort.

We get silk from the silkworm.

This worm makes a soft strong thread of silk and puts it round itself like a coat.

Wool, cotton, and silk are different sorts of cloth. We make clothing of all these sorts of cloth.

When the weather is cold we put on thick warm wool clothing. When the weather is warm we put on thin cotton clothing. Cotton clothing is not as warm as wool clothing.

Thick clothing keeps us warm. It keeps us warmer than thin clothing. Thick cloth keeps air in it, between the threads. The air does not let heat go through it.

A thick roof keeps the heat of the house in. A thin roof lets the heat go through it.

A thick roof keeps the heat of the sun out.

Here is a pencil.
It is straight.
It is not bent.

Here is a glass of water.

I put the pencil in the water.

The pencil seems bent
where it goes into the
water.

The pencil is straight but
it seems bent.

It seems like this.

But it is like this.

It is straight, not bent. It
seems bent, not straight.

Before I put the pencil in the water it seemed straight.
It was straight.

After I put it in the water it seemed bent.
It wasn't bent.

When it is in the water it seems bent.

When it is out of the water we see that it is straight.

Why did it seem bent when it was in the water?

This is a light.
A light sends out light.
The light which it sends out goes in straight lines.

Here is a bit of glass.
A ray of light is going through the glass.

Where the light goes into the glass, it is bent.

It is bent again where it comes out of the glass into the air.

Here is your eye.

You are looking at the pencil in the glass of water.

The light from the pencil is bent where it comes out of the water into the air.

It is bent here.

The pencil is not bent. But the light from it is bent.

The part of the pencil which is under the water seems to be where it is not.

This is a looking glass.

What do you see in the looking glass?
I see a girl's face in the glass.

She is looking at herself in the glass.
What does she see in the looking glass?
She sees herself in the glass.

She seems to be here.

She is on this side of the glass.
She seems to be on the other side of the glass.

Why? Because the glass sends the light back.

There seem to be two girls in this picture.
There is only one.

What is this man doing?
He is working with a spade. That is his work.

What is this woman doing?

She is working with her needle. That is her work.

What is this man doing?
He is making shoes. He is a shoemaker. That is his work.

These are shoes.

These are boots.

He makes boots and shoes. That is his work.

What is this man doing?

He is putting paint on
the door.

He is painting the door.

He is a painter.

That is his work.

This is his paint.

This is his brush.

He puts the paint on
with his paint brush.

$$\begin{array}{r} 2 \\ 2 \\ \hline 4 \end{array} \quad \begin{array}{r} 3 \\ 7 \\ \hline 10 \end{array} \quad \begin{array}{r} 14 \\ 26 \\ \hline 40 \end{array}$$

This is addition.

The boy is doing
addition.

That is his work.

This is a bank.

This is a check.

This is a cart.

This is a plow.

The plow is turning up the earth.

This is a field.

The farmer is plowing the field. That is part of his work as a farmer.

The farmer has an account with his bank.
He puts his money in the bank.
He keeps money in the bank.
He gets money from the bank.

The account says how much money he has in the bank.
Farming and keeping accounts are two different sorts of work.

What sort of work is this man doing?
He is cutting wood.

What sort of work is this woman doing?
She is washing stockings and dresses.

What sort of work does this man do?
He keeps a store.

It is a fruit store.
He is a storekeeper.

What sort of work does this woman do?
She keeps a house.

It is her house.
She is a housekeeper.

Put your fingers across one another like this.

I have my first and second fingers across one another.

Across?
These two lines go across one another.

My second finger is over and across my first finger.

Did you put your fingers across one another?
That is right.
You have your fingers across one another.

Now take a pencil and give a touch to one finger, and then a touch to the other and then put the pencil between them. Do this with your eyes shut.

You will have a strange feeling.
Are two pencils touching your fingers, or is only one pencil touching them?

Why is that? Here is the answer.

When the fingers are like this, or like this, they do their work together.

Do you have the strange feeling that two pencils are there?
When you are touching one finger only, you seem to be touching the other?

But when they are across one another they do not do their work together.
Then a touch to one sometimes seems to be a touch to the other.

What is their work?
What do the ends of our
fingers do?
Their chief work
is touching.

Those fingers are
touching the cover of
a book.
Touching gives us
knowledge.
When our eyes are shut,

or when we are looking
in another direction,
(She is touching
the book)

or when we are not
able to see, we get
knowledge through
touching and feeling
with our fingers.

The chief work of the ends of our fingers is touching.
Here is a man who is not able to see.

That is a Braille book which he has before him.
He is reading the book with the ends of his fingers.

Braille letters and words are like this. He is touching them with the ends of his fingers.

This other man is reading with his eyes.
He is not reading with his fingers.

What are those things on his nose?
They are his glasses.

What is the work of the eyes?

Seeing. Their work is seeing.

What is the work of the ears?

Hearing. Their work is hearing.

What is the work of the legs?

Walking. Walking is their chief work.

What is the work of the mouth?

Is talking or taking in food the chief work of the mouth?

What is the work of the hands?

Taking things up, putting them down, getting things, giving things, making things.

We do things with our hands.

QUESTIONS

- a** Is there more water in the sea than in a river?
- b** Give the names of three great discoveries.
- c** What is wool?
What is cotton?
Where do we get silk from?
- d** Why is thick clothing warmer than thin clothing?
- e** What is the chief work of the eyes, the ears, the mouth, and the fingers?
- f** What sorts of transport go on wheels?
- g** Where does smoke come from? Where does steam come from?
- h** Where do we get wood from?

.....
The answers are on page 120.

WHAT ARE THESE THINGS?

a

b

c

d

e

f

g

h

i

j

This page is page 119. The answers are on page 120.

Answers to questions on pages 118-119.

Page 118

- a** There is more water in the sea than in a river.
- b** Fire, the wheel, and clothing were three great discoveries.
- c** Wool is the hair of sheep.
Cotton is the hair round the seeds of the cotton plant. We get silk from the silkworm.
- d** Because thick clothing keeps heat from going through it.
- e** The chief work of the eyes is seeing, of the ears is hearing, of the mouth is taking in food, and of the fingers is touching.
- f** Carts, automobiles, and trains go on wheels.
- g** Smoke comes from fire.
Steam comes from boiling water.
- h** We get wood from trees.

Page 119

- a** a cart
- b** a plow
- c** a boot
- d** a looking-glass
- e** a skirt and a shirt
- f** a wheel
- g** a fire
- h** a spade
- i** a roll of cloth
- j** an umbrella

Seeing and hearing and touch are three of our senses.

We get knowledge through our eyes (seeing), through our ears (hearing), and through our fingers (touching). These are three of our chief senses.

Another sense is taste.

This is a man's tongue

These are his lips.

This is his chin.

The chief work of the tongue is tasting.

Here is some white powder on a plate. It may be salt or it may be sugar. Which is it—salt or sugar?

She is tasting the powder. She has some of it on her finger. She is putting some of the powder on her tongue. She is tasting it.

We get salt from the sea.
The water in the sea has salt in it.

We get salt from salt mines.
Some mines are deep.
They go far down into the earth.

We get sugar from plants.
We get it from the stems of some plants.

We get sugar from the roots of some plants.

The salt or sugar which we put in our food is a white powder.

The taste of sugar
is sweet.

This is a cake.

It has white sugar on
the top.
Cakes with sugar on
them are very sweet.

This is an orange.

This is its skin.

Some oranges are sweet.
But the taste of their skin
is bitter.

Salt has a salt taste.
Sugar has a sweet taste.
To the eye salt and sugar
seem the same.

But to the tongue they
are very different.

Their taste is
very different.

What is the work of
the nose?

What do we do with
our noses?

She has a flower in
her hand.

She is smelling
the flower.

Some flowers have a
sweet smell.

Some flowers have
no smell.

This is grass.

These flowers are in
a garden.

They have a sweet smell.

These are pigs.

Some pigs are dirty.

Some pigs are clean.

(See page 5.)

The smell of dirty pigs is
not sweet.

It is a bad smell.

This is smoke.

This is
a fire.

Some smoke has a
good smell.

The smell may not be
sweet, but it may be a
good smell.

He is smoking a pipe.

Is the smell of the
smoke good?

We see things with our eyes and we see their colors.

Here are some names of colors:

green	red
blue	yellow
white	gray

What is the color of grass and leaves in spring?

Grass and leaves in spring are green.

What is the color of this girl's lips?

Her lips are red.

The sky is blue.

It is blue when it is clear.
The color of some clouds is white.
Other clouds are gray.

The sun is yellow.

Sometimes when it is going down

or coming up it is red.

This flame is yellow.

We see things with our eyes.
 We see the sizes and colors of things.
 Sometimes things seem to our eyes greater or smaller than they are.
 They are not what they seem.

This man is tall.

This man is short.

This is a tall woman.

This is a short woman.

Here are two men.
 Do they seem the same size?

Which of them seems taller?

Does the man who is farther seem taller than the man who is nearer?
 The pictures of them are the same size.
 The lines in the picture make the man who is nearer seem shorter.

Seeing, hearing, touch, taste, and smell are "the five senses."

But we have more than five senses.

Which are some of the other senses?

Our sense of how warm or how cold things are is another.

Here is some cold water with ice in it.

It is very cold.

Here is some water in a kettle.

The water is boiling.

Steam is coming out of the kettle.

Here are three basins.

The basin to the right has very warm water in it.

The basin to the left has cold water in it.

The basin in the middle has water which is not cold and not warm in it.

Very
cold

Very
warm

I put my hands in the basins at the sides. One of my hands is in the cold water; the other is in the warm water. I keep them there for a time.

Now I am putting them together into the middle basin where the water is not cold and not warm.

What is this?
This water seems warm to one hand and it seems cold to the other!
It is the same water.
But it seems cold and warm at the same time!

Why is this?
It is because one hand was in warm water and the other in cold water before I put them in this middle basin.

Another sense is our sense of motion. Here is a seat which goes round and round.

A man is in the seat. He is going round and round...

At first he has a feeling that he is in motion. He has the feeling that he is going round. The seat, with the man in it, keeps on turning round at the same rate. It does not go quicker. It does not go slower.

After a time the man has a feeling that he is not in motion. But there is no change in the rate at which the seat is turning. It is going round the same number of times a minute.

After a time, if the rate of turning is the same, the man seems to be at rest (not in motion).

He is like all the men and women on the earth. We are all turning round all the time with the earth, but we seem to ourselves to be at rest.

We have no feeling that we are in motion. This is because the rate of turning is the same. The man is in motion. He seems to himself to be at rest.

Here are three boys and a dog. Two of the boys are taking a rest. They are resting on their beds. The other boy and the dog are in motion.

Now, put a stop to the motion of the seat.
When you do that the seat is at rest.
The man is not in motion.

But he has a feeling that he is turning round and round.
This is a picture of his feelings.

He is not turning round.
But he seems to himself to be turning round.
And everything round him seems to be turning round.
Why is this?

It is because change in our motion is the cause of our feelings of motion.
Through our sense of motion we get knowledge of changes in the rate and direction of our motion.

What is he doing?
He is hammering.

This is his
hammer.

These are
nails of
different sizes.

He is putting the cover
on a box.

He is nailing down the
cover of the box.

The cover is on the top
of the box.

The blows of the
hammer make a noise.
He is making a very
loud noise.

Mary has her hands over
her ears.

"What a noise!" She is
saying, "What a noise
you are making."

Some noises are loud.
These are guns.

Guns make loud noises.
Those guns make more
noise than this gun.

What is this?

It is a whistle.

It is a steam
whistle.

It is making a
loud noise.

This boy has a
pocket whistle.

He is making
some noise
with it but
not much
noise.

This is music.

This is a song.

These are
notes.

This is a high note.

This is a low note.

This is a very high
mountain.

These are high
mountains.

This is a high
building.
It is a church.

This is a low
building.

Noises and songs are sounds.
What are sounds?
They are the effects of waves in the air.

These are waves in the sea.

These are waves in a cord.
One end of the cord is fixed to a tree and the boy has the other end.
He is shaking it up and down.

With every shake he sends a wave down the cord to the tree.

As the wave goes down the cord this part, which was up,

goes down.
And this part, which was down, goes up.

These are waves in the air.
They come to our ears.
They have effects in our ears and brains.
Those effects are sounds.

Here is a brain.
The part of the brain which does the most work in hearing has the word HEARING on it.

"The most"?
Some things have water in them.

This cup has some water in it.

This bucket has more water in it.

The sea has the most water in it.

Some animals have brains:
a horse has some brains;
a monkey has more brains;
and a person has the most brains of the three.

I have two dollars.
 You have twenty dollars.
 He has a thousand dollars.
 He has more money than we have.
 You have more than I have.
 He has the most money.

I have less money than he has.
 I have less than you have.
 I have the least money.

The most	\$1000	
More	\$20	less
	\$2	The least

This is the highest note.

This is a lower note,

but it is higher than this note.

Which is the lowest note of the three?

Farming is an important sort of work.

Is it more important than banking?

This mine
is deep.

This mine is deeper.

This mine is the deepest
of the three.

This plate has some salt
on it.

This plate has more salt
on it.

This plate has the most
salt on it.

It has more salt on it
than the other plates.

This is a
good book.

These are
two other
good books.

One of them is better
than the others. It is the
best book of the three.

This is a bad fire.

This is a worse fire.

This is the worst fire of
the three.

She is looking at herself in a looking glass.
Again and again, every day, she takes a look at herself in a glass.

Whenever she sees a looking glass she goes to it and takes a look at herself.

Because looking at herself in the glass gives her pleasure.
She is beautiful.
She sees that she is beautiful.

Looking at himself in the glass gives him no pleasure.
It gives him pain. Why?
He sees himself.
Is he beautiful?

"Pleasure?" What is that?
 "Pain?" What is that?

Put your finger
 in the flame.
 No, I will not.
 Why not?
 Because of the pain.

Here is a nail.

You put your
 finger nail
 over this
 nail, and I
 will give it
 a blow with
 this hammer.

No, you will not.
 I see what pain is now.
 I see what the sense of
 the word "pain" is now.
 This is another use of
 the word "sense."

That is pain.
 Pleasure is the opposite
 of pain.
 "Opposite?" Good is the
 opposite of bad.

Good weather.
The day is bright.
The air is warm.
The sky is blue.
They are happy.

Bad weather.
The wind is blowing.
The rain is falling.
It is cold. It is wet.
They are unhappy.

Bright is the opposite of dark.

Warm is the opposite of cold.

White is the opposite of black.

What is the opposite of dry? (See page 8.)
What is the opposite of happy?

Which of these is
a high building?
What is the other?

What is the opposite
of narrow?
Is this street narrow?

Up
is the
 opposite
of down.

In is the opposite of out.

To is the opposite
of from.

Pleasure is the opposite
of pain.

Beautiful things give us pleasure.

When she sees herself in the glass, she sees that she is beautiful. That gives her pleasure.

It is there because she has a feeling of pleasure. Her pleasure is the cause of her smile. She is saying to herself, "I am beautiful."

When I say that she is beautiful, that gives her pleasure.

There is a smile on her face now.

Why is the smile there?

She is saying to herself that she is beautiful.

A smile does not make a sound. A laugh makes a sound.

A laugh is a smile with a sound.

This is a great painting
by Leonardo.

Its name is the
Mona Lisa.

The picture is beautiful.
That is certain.

Was the woman
beautiful?
Was Lisa herself
beautiful?
That is not certain.

I have my idea of that.

He has his idea.

She had her idea.
We may have different
ideas of how beautiful
that woman was.
There is no measure of
the beautiful.

She may or may not be beautiful.

But it is certain that she has a smile on her lips. That is certain.

It is not certain that she is beautiful.

a is equal to b , and b is equal to c , and c is equal to d .

So a is equal to d .

Things which are equal to the same things are equal to one another.

$$2 + 2 = 4$$

$2 + 2 = 4$. Two and two are equal to four. That is certain.

$$2 + 2 \neq 5$$

$2 + 2 = 5$. Two and two are not equal to five. That is certain.

It is certain that $2 + 2 = 4$.

Things which are like one another may be equal or they may not.

These two are like one another but they are not equal.

A smile is like a laugh.
But a laugh makes
a sound.

This girl is laughing.
She is happy.

She has a fall. She gives
a cry.

Now she is crying. She is
not laughing now. She is
crying. Why?

Because she gave her
knee a blow in her fall.

This is
her knee.

She was on
her feet.

Then she was on
her face.
She had a fall.

The fall was the cause of
the blow to her knee.

The blow was the cause
of the pain in her knee.

And the pain in
her knee was the cause
of her crying.

Pleasure and pain
are feelings.
We have feelings of
pleasure and pain.
Here are some pleasures.

He is on the sand at
the seaside, looking at
and hearing the sound of
the waves and warming
himself in the sun.
These are pleasures.

Now he is taking a swim
in the sea.

He is swimming through
the waves.
He is a good swimmer.
To a good swimmer,
swimming is a pleasure.

Now he is resting in the
sun again after his swim.

After the water the sun
on his skin is a pleasure
to him.

Pleasure and pain are feelings.

When we put our fingers on things we have feelings—feelings of touch or of heat and cold. But this is another use of the word “feeling.”

The man is feeling the bit of wood with his fingers. Is it rough or is it smooth?

Things which give us pleasure have an attraction for us. But it is not the same sort of attraction as the attraction between the earth and the moon. (See pages 82-83.)

Our feeling of this attraction is named “desire.”

When we have pleasure we have a desire for the pleasure to go on and go on...

Time goes on. The hands of the clock go on. Our feelings may or may not go on.

Some desires are stronger than others. This baby sees the cat and he sees his ball.

The cat has an attraction for him. He has a desire for the cat.

His ball has an attraction for him. He has a desire for the ball.

Which will he go to? If his desire for the cat is stronger than his desire for the ball, he will go to the cat.

He went to the cat. His desire for the cat was stronger.

All our desires are for things which seem good to us. They may not be good. Our ideas of them may be wrong.

We get knowledge by putting questions. That is one way of getting knowledge. The answers may give us knowledge or they may not.

When the answers are right, they give us knowledge.

When they are wrong they do not give us knowledge.

$2 + 2 = 4$ Right

$2 + 2 = 5$ Wrong

How far is the sun from the earth?
Which is the right answer:
"It is two miles away" or
"it is much more than two miles away?"
Which is the wrong answer to the question?

Which is his right hand?

Which is his left hand?
He is facing you.

Now he has his back to you.

Which is his left hand now, and which is his right?

Our senses—seeing, hearing, touching, tasting, and smelling—are ways through which we get knowledge. Our ideas come to us through our senses.

This is a doorway.

The way into the room is through the door. The way out of the room is through the door.

“Which is the way to the station?” “Take the first street to the right.”

This man had no knowledge of the way to the station. Now he has the knowledge.

We get knowledge in different ways—through our senses,

through talk with others,

through the work we do with our hands and our heads, and through books.

These are all ways of getting knowledge.

Knowledge is very important. It is important in itself. And it is important as a way to other things. A person who has no knowledge is of no use to others.

Is the word “use” part of your knowledge of English?

(See page 99.)

Knowledge gives us light. It makes things clearer to us.

This is a boy.

He will be a man.

He was a baby.

He seems to be about twelve years old now.

Every night he has a long sleep in his bed.

He goes to bed at eight every night.

He gets up every morning at seven.

He puts his clothing on.

He gets out of bed and gives himself a good wash.

He says "Good morning" to his mother and father and takes his place at the table.

At school he sees his friends and does his work.

He keeps his thoughts on his work.

He does not let his thoughts go off to other things.

At play after school he sends the ball a long way.

He makes it go a long way.

Then he comes back from school.

Here he is with the family again.

Men and women
are persons. 
They have their work. 
They put and
take things, 
 and give
 and get them
They come 
and go.  → 

They see and 
say things, 
keep things, 
and let them (go), 
make and 
send them. 

Some seem happier than others.
All these sorts of things are done by men and women.
Things are put and taken by them.
Things are given and got by them.
Things are seen and said by them.
Things are kept and let go by them.
Things are made and sent by them.

Eve saw the apple.

She took it.

She gave it to Adam.
Eve did these things.

The apple was seen
by her.

It was taken by her.
It was given by her
to Adam.

These things were done
by Eve.

We may say this in
two ways.

She saw the apple
and took it and gave
it to Adam.

This may be said in
two ways.

The apple was seen by
Eve, and taken and given
by her to Adam.

I will do it.	:	It will be done by me.
I am doing it.	:	It is being done by me.
I did it.	:	It was done by me.
They will see it.	:	It will be seen by them.
They are taking it.	:	It is being taken by them.
They gave it.	:	It was given by them.
DO TAKE	:	DONE TAKEN
SEE GIVE	:	SEEN GIVEN

I will say it.	:	It will be said by me.
I said it.	:	It was said by me.
I made it.	:	It was made by me.
I kept it.	:	It was kept by me.
I let it go.	:	It was let go by me.
I put it there.	:	It was put there by me.
I got it.	:	It was got by me.
I sent it.	:	It was sent by me.
SAY MAKE KEEP	:	SAID MADE KEPT
LET PUT	:	LET PUT
GET SEND	:	GOT SENT

Every statement or question in this book has one or more of these sixteen words in it:

be	come	give	make
have	go	get	send
do	put	keep	see
seem	take	let	say

The first of these words, BE, comes into more statements than any other.

Here it is. It goes like this:

	<i>Past</i>	<i>Present</i>	<i>Future</i>
I	was	am	will be
He } She } It }	was	is	will be
We } You } They }	were	are	will be

Here are the other fifteen words. They go like this:

	<i>Past</i>	<i>Present</i>	<i>Future</i>
I	had	have	will have
	did	do	will do
	seemed	seem	will seem
	came	come	will come
We	went	go	will go
	put	put	will put
	took	take	will take
You	gave	give	will give
	got	get	will get
	kept	keep	will keep
They	let	let	will let
	made	make	will make
	sent	send	will send
	saw	see	will see
	said	say	will say

	<i>Past</i>	<i>Present</i>	<i>Future</i>
He	had	has	will have
	did	does	will do
	seemed	seems	will seem
	came	comes	will come
	went	goes	will go
She	put	puts	will put
	took	takes	will take
	gave	gives	will give
	got	gets	will get
It	kept	keeps	will keep
	let	lets	will let
	made	makes	will make
	sent	sends	will send
	saw	sees	will see
	said	says	will say

In English we do not make statements like this:

She gave you money to I. That is wrong.

We make statements like this:

She gave your money to me. That is right.

I	my	me	we	our	us
you	your	you	you	your	you
he	his	him	} they	their	them
she	her	her			
it	its	it			

In English we make COMPARISONS like this:

good	better	best
bad	worse	worst
much	more	most
little	less	least
beautiful	more beautiful	most beautiful
small	smaller	smallest
bright	brighter	brightest
short	shorter	shortest
thin	thinner	thinnest

In English we make changes in names like this:

1 cat (dog, boot, day, nose, face...)	2 or more cats (dogs, boots days, noses, faces...)
1 glass (watch, brush...)	2 glasses (watches, brushes...)
1 body (cry, baby...)	2 bodies (cries, babies...)
1 knife (leaf, shelf...)	2 knives (leaves, shelves...)
1 tooth, foot	2 teeth, feet
1 man, woman	2 men, women

1 or more sheep, scissors, trousers

A SECOND WORKBOOK OF ENGLISH

PREFACE

The workbook exercises are graded to confirm and support the sentence sequences from page 2 on of the text. They apply the teaching of vocabulary and structure in simple problem situations which beginners in English can solve, stage by stage, for themselves. They may then check their growing competence by the answers provided.

The workbook should be used without recourse to explanation other than the pictures and examples provided, and the text of *English Through Pictures Book I*, which it follows. Teachers using the materials with classes will get the best results if they refrain from the use of translation and bilingual dictionaries. Simple demonstration of the sentence situations presented in the book can readily be made with the help of objects and pictures. Students can be induced to act out the meaning of what they are saying when they are placed in the carefully designed situations that the text provides. Adequate study of the sentence situations will prepare them to solve these workbook problems with enjoyment, and to discuss them in the English they are learning.

Christine Gibson

(Pages 2-11)

1. What is she doing?

She is putting a
hairpin in her hair.

2. What is he doing?

3. What is she doing?

4. What are they doing?

5. What is he doing?

(Pages 2-11)

1. What sort of room is the woman in?

She is in a bedroom.

2. Where is the bag?

3. What is in the woman's left hand?

4. What does the woman see in the sock?

5. What is by the basin?

(Pages 2-11)

6. Where are the trousers?

7. Where is the basin?

8. Where is the hairbrush?

9. Where are the shirts?

10. Where are the shoes?

(Pages 2-11)

A Journey

Mr. and Mrs. James Grant and their son, Peter, are going on a journey from New York City in New York State to Salt Lake City in Utah. Some time before the journey Mr. Grant said to Mrs. Grant and Peter, "We will go by plane. A plane journey to Salt Lake City takes a very short time."

Peter said to his father, "There are horses and cows and sheep and pigs between here and Utah, aren't there? Do you see them from a plane?"

"No," said his father, "the plane goes very high in the air."

Mrs. Grant said, "Going by bus  or train, you see all the states between New York and Utah and houses and men and women and boys and girls and animals."

(Pages 2-11)

"You are right," said Mr. Grant. "You do see all these things. But it takes a long time to go by bus or train."

"Mother goes on a bus," said Peter, "when she goes to the store."

"But that is a short journey," his father said. "This will be a long one."

"We took a train when we went to Washington, D.C.," said Peter. "When we were there, you took a picture of me and mother in front of the White House, and a dog came and got in the picture with us."

"'Mother and me,' not 'me and mother,' Peter," said his father.

(Pages 2-11)

"Yes, you did make a long journey by train when you were five," Mrs. Grant said. "And now is the time for another. My sister and her family are in Chicago. They are in a new house and have a new baby. We will go and see them. Then we will go to Salt Lake City."

"All right," Mr. Grant said. "We will make our journey in two parts. We will take a plane to Chicago and see your sister's family. Then we will take the bus which goes from there to Salt Lake City."

"Oh good!" said Peter. "We will go by plane and by bus!"

5. The _____ from New York City by plane takes a short time.
6. Illinois and Nebraska are two of the states _____ New York and Utah.
7. The Grants will go to Chicago _____ they go to Salt Lake City.
8. They will go to Salt Lake City _____ they see Mrs. Grant's sister in Chicago.

(Pages 2-11)

When the Grants were going to their plane, the wind took Mrs. Grant's hat off her head and up into the air. The hat came down by the side of a building. Mr. Grant went

after it. In a short time he came back with the hat. "It is dirty and a bit wet," he said.

"Do I see a hole in the hat?" said Mrs. Grant.

"Where?" said Mr. Grant.

"Here," Mrs. Grant said, putting her finger on the hat.

"Oh, I see now. It is dirty, but there is no hole."

Mr. Grant gave the hat to Mrs. Grant, saying, "Our plane is here. We have to get on it now. The hat will be dry in a short time." He took up two of the bags. Mrs. Grant had her hat and another bag in her right hand. Peter put his hand in her left hand, and they went over to the plane.

After they were in their seats and the plane was in the air, Mrs. Grant went to the washroom at the back of the plane with her hat and her bag. She put the hat,

(Pages 2-11)

which was drying, and the bag to one side. Some of her hairpins were coming out of her hair. She took the other hairpins out, and her hair came down. She took her comb and hairbrush out of the bag. After

brushing and combing her hair, she put it up again with the hairpins. She put the comb and hairbrush back in her bag and then took out another bag in which she had her washcloth. She had no soap with her, but there was some soap in the washroom. She put the washcloth in the warm water in the basin and put soap on it. After washing her face and hands, she put the washcloth in the washcloth bag again. When the wet washcloth was in its bag, it did not make her other things wet.

By this time Mrs. Grant's hat was dry. It was a cloth hat. She took a brush and gave the hat a good brushing. In a short time the dirty part of the hat was clean again.

the _____ back in.
12. She put her _____ and _____
back in her bag and then took her _____
out of another bag.

(Pages 2-15)

The Grants were in Chicago from Wednesday to Saturday. On Friday Mr. Grant went to the bus station and got three tickets to Salt Lake City. He went to the ticket office and said, "How much are three tickets to Salt Lake City? One is for my son, who is seven."

The man said, "Your son's ticket is \$37.40. The other tickets are \$74.80."

Mr. Grant gave two hundred dollars to the man, and the man gave \$13.00 and three tickets to him.

"Is there a bus to Salt Lake City in the morning?"

"Yes," said the man. "One goes at 5:30 and another at 10:15."

"We will take the 10:15 bus," said Mr. Grant.

"Be here a little before that time," said the man.

"Yes, we will," said Mr. Grant. "Thank you."

On Saturday the Grants took a taxi to the bus station. They got on the bus at 10:05. Peter got a seat by the window. His mother was at his side and his father had a seat in front of them.

(Pages 2-15)

That day their bus went through a part of two states, Illinois and Iowa. When they got to Des Moines, Iowa, the street lights were on. They went into the bus station for some food. Then they went back to the bus.

By this time Peter was ready for bed. His father put down the back of his seat for him. Now the seat was like a bed. His mother put something soft under his head and a coat over him. That is how Peter went to bed on the bus.

The Grants were on the bus a part of Saturday and all of Sunday. When they got to Salt Lake City, their friends, Mr. and Mrs. William Price, were at the bus station waiting for them. After shaking hands, Mr. Price said to Mr. Grant, "Please let me have your bags." Mr. Grant let him take one bag. Then the Prices took the Grants back to their house with them.

This is a room in a school (education, school).
The teacher is at the _____ (board, paper). He
is _____ (learning, teaching) English. The men
and women are _____ (learning, teaching)
English. They went to _____ (education, school)
when they were boys and girls, but English was not part
of their _____ (education, school). Now they
are _____ (getting, living) in the United States.

(Pages 16-25)

The _____ (board, teacher) is writing letters on the _____ (board, teacher). The men and women are _____ (reading, writing) the letters on _____ (paper, pens) with their _____ (paper, pens). They will put some of the _____ (letters, words) together and make _____ (letters, words). They do not have much English, but in time reading and writing English will not be hard for them.

(Pages 16-25)

This man is writing a letter. He is writing to the editor of the newspaper which he gets. An editor is one of the men who do work for the newspaper. He says what will get into the newspaper. This is what Mr. Penn is writing:

1320 South Street
Littleton, Ohio
May 16, 2004

The Town Times
45 High Street
Littleton, Ohio

Dear Sir:

I saw the story in your newspaper on what Senator Fillimaster said in Washington. Your paper said that Senator Fillimaster is not right, but I say that he is right.

Senator Fillimaster said that there was money in Washington for education. He said, "Let Washington give this money to the states and then the states will give it to the towns. When this money goes to the towns of the United States, all of them will have money for good buildings and good teachers."

(Pages 16-25)

Cities are very great towns. They have money for good school buildings and good teachers. But towns like this one in which we are living do not have much money for education. There are a great number of boys and girls, and the old school buildings will not take them all. Towns like this one put all their money into new school buildings, and there isn't money for the teachers, who do very hard work. How will we get good teachers when we give them little money?

Your newspaper said, "Education is not the work of the men in Washington. When the men in Washington give money to us, the education of our boys and girls will be in their hands. Let Washington keep its money. Education is the work of the towns."

Like Senator Fillimaster, I say that this is a question of money, and Washington has the answer. Washington will not keep us from doing the right things with this money. But with little money we will not have good schools or good teachers, and then how will we have good education?

Yours truly,

Percival Penn

Percival Penn

(Pages 16-25)

1. Mr. Penn was living in a _____ (town, city).
2. Senator Fillimaster said that when Washington gives money to the _____ (states, cities), then they will give it to the towns.
3. _____ (Towns, Cities) have a great number of persons in them.
4. Ohio is a _____ (state, city).
5. New York City is a _____ (town, city).

(Pages 16-25)

There! Mr. Penn put his pen down and took up the letter. After reading it over four times, he said, "This is a very good letter. Now I will put it in the letter box."

He then put on his hat and coat. He went out of the house and down the front steps to the street. There was a letter box on the other side of the street.

Before he put the letter into the letter box, he took a look at the front of it. "Oh!" he said. "There is no stamp on this!"

He went back into the house. He went through all the drawers in his writing table, but there were no stamps.

"Dorothy," he said, "do you have some stamps?"

(Pages 16-25)

Mrs. Penn was coming into the room with a postcard in her hand. "There isn't a stamp in the house," she said. "Are you going to the post office?"

Mr. Penn said, "I wasn't going, but now I will. Do you have a letter ready for the post?"

"This is a postcard to our friend, Susan. I put two or three lines on the back of it, saying, 'We will come and see you on Saturday. Percy sends his love.'"

"Good," said Mr. Penn. "I will take it with my letter to the post office and get some stamps."

"Get a hundred," said Mrs. Penn. "Then we will not be going to the post office every day."

(Pages 16-25)

1. After he put his hat and coat on, Mr. Penn went _____ the house and down the front _____.
2. He went to the letter box on the other side of the _____.
3. He had his _____ in his hand.
4. There was no _____ on the letter.
5. He went back into the _____.
6. Mrs. Penn was writing a _____ to their _____, Susan.
7. On the back of the card Mrs. Penn said, "Percy _____ his _____."
8. Mr. Penn will go to the _____ and get a _____ stamps.

(Pages 16-25)

On the back page of the newspaper which Mr. Penn got, there was a part for letters like the one which he sent. Two days went by before his letter got into the paper, but, then, there it was with three other letters. He took a good look at it. Yes, the words were the same ones which he put in the letter.

Two of the other three letters had questions in them. Under these letters there was a short answer from the editor.

One letter was on the same story of Senator Fillimaster. The man who sent this letter to the newspaper was a Mr. Gordon White. He and Mr. Penn were living on the same street, but not at the same number. They sent their letters to the newspaper on the same day, but they did not say the same thing. Here is Mr. White's letter:

1851 South Street Littleton, Ohio May 16, 2004
The Town Times 45 High Street Littleton, Ohio
Dear Sir, The story in your newspaper on Senator
Fillimaster was very good. You are right. Let Senator
Fillimaster and his friends in Washington keep their
hands off our schools. Yours truly, Gordon White

(Pages 16-25)

Philip Harrington is a newspaper man writing for a great city paper. His work takes him to different parts of the city and lets him see what is going on there. By questioning persons in the streets he gets together stories for the newspaper and takes or sends them to his office. Reading these stories is the work of another man on the paper. Philip does the work of a reporter and the other man is an editor. That is their work.

From the windows of the newspaper office, which is high up in a downtown building, one sees the water on a clear day. The city has a great harbor with ships coming in from everywhere. Philip's editor sent him to the harbor one day to get a story about the men out of work. Dock workers (men who put things on and take them off ships in the harbor) were getting \$12.47 an hour at that time and were saying they were not happy. This was not very much for the hard work they did.

Philip went from one to another of the men on the streets near the harbor, questioning them and their friends and writing down what they said. "We will go

(Pages 16-25)

back to work when we get \$13.80 an hour, but not before," said the men. Philip put this into his story for the paper, and he put other things into it—what other men said of these dock workers who kept ships in harbor and kept others from making journeys which they were ready and waiting to make. He gave a picture of the families of these men out of work. There were different sides to the question and Philip's story made them clear. When he saw it, the editor put Philip's story on the front page of the paper and that made Philip very happy.

Philip Harrington is one of two men who will be sent to Switzerland by their newspaper in a short time. He will be there for three weeks. Men and women from all parts of the earth will be in Switzerland together when the two men are there. Philip will send stories of what these men and women say and do to his editor in the United States. The other man will send pictures. Journeys like this are hard work. Philip will be doing a great part of his writing at night and sending his stories to his editor before morning. In a day or two men and women in the United States will be reading these stories and seeing the pictures of what is going on in Europe.

(Pages 16-25)

Put the parts of one story under Picture A and the other under Picture B.

He is going to his work in the newspaper office.

This is Philip.

It is night in Switzerland.

3. James was happy when he got the box which his mother _____. It had food in it.

(Pages 22-24)

The earth goes round from east to west. Cities in the East of the United States get the light of the sun before cities in the West. It is 6 a.m. or six in the morning in New York City before it is 6 a.m. in Chicago, and it is 6 a.m. in Chicago before it is 6 a.m. in San Francisco.

Let us say that now it is 8 a.m. on Tuesday in New York City. Then it is 7 a.m. in Chicago, 6 a.m. in Denver, and 5 a.m. in San Francisco. The men and women in New York City are going to work, but those in San Francisco will be in bed for another hour or two. The time of day in the two cities is different, but it is the same day.

(Pages 22-24)

There are times when it is not the same day in the two cities. When it is 10 p.m. (ten at night) in San Francisco, it is 11 p.m. on the same day in Denver, 12 at night or 12 midnight, as we say, in Chicago, and 1 a.m. in the morning on Wednesday in New York City. It is Wednesday in New York City before it is Wednesday in San Francisco.

When a man goes from New York City to Chicago, he will "make" time by putting the hands of the clock back one hour. The day of his journey will be twenty-five hours long. When a person goes from New York City to San Francisco the day of his journey will be twenty-seven hours long. But the day he comes back east will be twenty-one hours.

Some planes go from New York City to San Francisco in three hours. A person who gets on one of these planes in New York City at 4 p.m. New York time will get off the plane in San Francisco at 4 p.m. San Francisco time! That day will be twenty-seven hours long for him, but it will be twenty-four hours long for us.

(Pages 22-25)

round before p.m. hours east night
west a.m. after morning hour

1. The earth goes _____ from east to west.
2. Cities in the _____ of the United States get the light of the sun after cities in the _____.
3. When it is 9 in the morning, we say it is 9 _____ and when it is 9 at night, we say it is 9 _____.
4. It is 2 a.m. in San Francisco _____ it is 2 a.m. in New York City.
5. It is 11 p.m. in Denver _____ it is 11 p.m. in San Francisco.
6. When a person goes from Denver to New York City, the clocks are two _____ different when he gets there.
7. When a person goes from New York City to Chicago, the clocks are one _____ different when he gets there.
8. When it is 2 on Saturday _____ in New York City, it is 11 on Friday _____ in San Francisco.

(Page 25)

Answer: It is four.

Your answer: _____

5. Question: Is that your hat?

Answer: No, it is not.

Your answer: _____

6. Question: What are you doing with those bags in your hands?

Answer: I am going south for a week.

Your answer: _____

(Pages 44-50)

Paul went into the room where his mother was making a dress on a sewing machine.

This is a sewing machine. Paul saw the machine.

Paul: What is that?

Mother: This is the new sewing machine which your father got for me. It is an instrument for making clothing.

Paul: What are you _____ (do, doing) with it?

Mother: I am making a dress.

Paul: Oh, the _____ (collar, coat) of your dress goes up, not down! And there are the _____ (buttonholes, buttons). But they are not open!

Mother: No, they are not. I made them by machine. I made the buttonholes in your coat by hand, but that takes a longer time. Now, see, I am making

(Pages 44-50)

a _____
(narrow, wide) cut down
the middle of this one with
the _____

(dress, scissors). There! It is open now.

Paul: Are these buttons going on the dress?

Mother: Yes, some machines
put them on, but my
machine does not. I will put
them on by hand.

Paul: Here they are.

Mother: Give one of them to me and
put the others on the table. I am
putting the _____ (knife,
needle) and _____ (cord,
thread) through the cloth of the
dress. Now the needle is going
through a hole in the _____
(blade, button). I put a zipper in the
side of my dress with the machine.

Here is a picture of a zipper. Do you see
all the little teeth?

Paul: Yes, they come together when the
zipper is shut.

_____ of the year.

(Pages 55-57)

sun half than June warm
July summer August

This is a picture of summer. Men, women, boys and girls are out in the _____. The summer months are _____, _____, and _____. In _____ the days are longer _____ the nights. The air is _____. The spring and summer months together make one _____ of a year.

(Pages 55-57)

quarters November shorter falling
fall October September

This is a picture of fall. The leaves are _____
off the trees. The fall months are _____,
_____, and _____.

The days are getting _____. Spring,
summer and _____ together make
three _____ of a year.

(Pages 55-57)

December winter year January
snow February nights

This is a picture of winter. There is _____
 over everything. The winter months are
 _____, _____, and
 _____. In _____ the days
 are shorter than the _____. The spring,
 summer, fall, and winter months together make
 one _____.

Page 55-71)

government land instruments island map
sea near distances river pictures

On the opposite page is a _____. The lines with the numbers on them say how high the _____ is. Near the _____ it goes up to 400 feet. _____ the _____ it is not more than 100 feet. All the land on the _____ is under 100 feet.

The _____ makes maps like this. Men and women go up in airplanes and take _____ of the land. Others go over the land on foot, taking _____ with them for measuring _____ and getting directions.

(Pages 57-69)

Mount Washington is a mountain in the state of New Hampshire. It is 6,288 _____ (feet, miles) high. A person _____ (map, may) go up this mountain by automobile, by train or on foot.

The Carriage Road is for _____ (automobiles, planes). It is eight _____ (miles, yards) long. Going up the mountain by automobile takes _____ (about, more) half an hour. Going up by train takes one hour and forty-five _____ (inches, minutes), and coming down takes forty-five minutes. The journey down is _____ (quick, quicker) than the journey up, but _____ (slow, slower) than the journey by automobile.

Walking up Mt. Washington is a _____ (soft, slow) journey. The _____ (distance, measure) on foot may or may not be greater than by automobile or train, but going on foot takes _____ (equal, more) time. There are numbers of trails; trails are roads for those who are walking.

(Pages 57-69)

Going up Mt. Washington is _____
(equal, sometimes) like going from summer into
winter. A _____ (dark, quick) change in the
direction of the wind may make a warm, bright day
into a cold, dark one. Sometimes clouds will come
down in a minute or two and put a _____
clear, thick) cover over everything. A person may see
no more than two _____ (miles, yards) in
front of him. When he gets into the thickest cloud, he
may see no more than a number of _____
(inches, distance).

Walking in the mountains is for persons who have
warm clothing, strong shoes, food and a _____
(map, river) with them. One who does not take these
things may have a bad time. Some take a _____
(stick, yard) with them.

A _____ (walk, walking) on a mountain
and a walk in a city may be _____ (equal,
same) in distance, but they are not the same thing at
all. Walking in the mountains is hard work, but those
with a love for mountains are happy doing it.

(Pages 59-62)

The Wilsons are a family of five. Mr. and Mrs. Wilson have three boys: Arthur, James, and Joseph. Joseph came after the other two boys and James came after Arthur.

older younger oldest youngest

- A. 1. Arthur is the _____.
2. James is _____ than Joseph.
3. Joseph is the _____.
4. He is _____ than James and Arthur.

Here are three shirts.

cleaner cleanest dirtier dirtiest

- B. 1. The shirt on the left is the _____.
2. It is _____ than the other two.
3. The shirt in the middle is the _____.
4. It is _____ than the other two.

(Pages 61-66)

1. Here are three doors. The one on the right is the _____ (thicker, thickest). It is _____ (thicker, thickest) than the other two. The other two are not _____ (as, than) thick _____ (as, than) it is.

2. Here are three balls. The ball in the middle is _____ (harder, hardest) than the one on the left, but not _____ (as, than) hard _____ (as, than) the one on the right. The one on the right is the _____ (harder, hardest). The one on the left is the _____ (softer, softest).

(Pages 61-66)

1. The Nile River is 4,160 miles long. The Amazon River is 3,900 miles long, and the Ganges River is 1,540 miles long. The Nile is the _____ (longer, longest) of the three. The Amazon is _____ (longer, longest) than the Ganges.
2. Victoria Falls are four waterfalls together in the south of Africa. One of them, Leaping Waterfall, is 36 yards wide. Another, Main Fall, has two parts 573 and 525 yards wide, and another, Rainbow Fall is 600 yards wide. Leaping Waterfall is the _____ (widest, narrowest) of these falls and Rainbow Fall is the _____ (widest, narrowest).

(Pages 61-79)

Changes in transport are going on all the time. Before 1800, men and women made journeys on foot, horse-back, ship, and by carriage, much as others before them did. Through the years, they made better ships and carriages, but the changes were not very great.

Great changes in transport came after 1800. First there was the steam engine of James Watt, and then came the steam carriage, the steamship, and the train. After Robert Fulton's steamship, the *Clermont*, there were more and more steamships on rivers, and before long, steamships were going over the sea between America and Europe.

Between 1820 and 1830, there were numbers of steam carriages on the roads of England. These were like horse carriages with no horses. A steam engine made them go. In 1814 George Stephenson made an engine for a train of carriages, four or five or six in line, and in a short time, trains were taking the place of horses and steam carriages.

Men were making automobiles in Europe and the United States before 1900. By 1913, Henry Ford was putting automobiles onto the roads of the United States in great numbers. Before that, roads

(Pages 61-79)

were opening through the sky. The Wright brothers gave us a new sort of transport in 1903 when they went up in their first airplane.

Airplanes are the quickest sort of transport. Today they go through the air at six hundred miles an hour or more.

Now greater changes are taking place than ever before. We are making new sorts of transport—transport which takes off from our earth for greater and greater distances. By the year 2050, great numbers of us may be making journeys to the moon and other places far from the earth.

You will give answers to these questions:

1. What changes in transport came between 1800 and 1900?

The changes in transport which came between 1800 and 1900 were the steam carriage, the steamship, and the train.

(Pages 61-71)

2. By the year 2050, what new journeys may your sons and daughters be making?

3. What sorts of transport are there for journeys on land? over the water? through the air?

(Pages 67- 69)

"Our street is _____ (equal, changing). It is getting more and more buildings on it. It is getting _____ (ever, full) of buildings," said David Martin. "The day will come when the tall buildings round us will keep the sunlight from coming in the windows and it will be _____ (bright, dark) all day long in here."

Mary Martin went over to the window by David and took a look at the new building going up on the other side of the street.

"Let's get a place with three or four rooms in a building which is very high. Then we'll have sunlight some part of the day," she said. "High up in the building there is more light and air and the rooms are _____ (brighter, darker)."

"But the _____ (price, why) of places like that is as high as the building it is in and we do not have enough money for it. Let's go somewhere where there is some _____ (land, more) round a little house. Then we will get enough sunlight and we will not see buildings in every direction."

(Pages 67-69)

"Yes, _____ (sometimes, why) don't we?" said Mary.

They got into their automobile and went to the office of a friend, who said to them, "I have the right house for you. Come and see it."

He took them four miles out of town. There they saw a new little house with some land round it. There were trees between the house and the other houses.

"Did you _____ (about, ever) see a better house?" said David to Mary.

"No, I never did," said Mary. "But how much is it?"

The price didn't make David very happy. But the man said to him, "By putting a little money down for the house now, you may go right into it. It will be your house. After that, the money which you put out every month will be no more than what you are giving for the place where you are living now."

"Good," said David. "That is what we will do."

(Pages 30-71)

1. Some places in the U.S. are far _____
(from, to) one another.
2. The distance from one place _____ (to,
of) another may be great.
3. A person may do different things _____
(with, for) his money.
4. It is bad when a train goes _____ (off,
on) its rails.
5. When we see the earth _____ (from, of)
the north, we see more land than water.
6. Flowers keep their faces _____ (to, at)
the sun.
7. Making buttonholes _____ for, on)
buttons is work.
8. A plane may go a great distance _____
(in, of) an hour.
9. When you go out of your house, keep some
money with you _____ (at, to) all times.
10. There are three feet _____ (in, on) a yard.

(Pages 30-71)

1. Which girl has the long hair?
the girl on the
right.

2. Which man is saying, "Let
me see the map?"

3. Which man is on an island?

4. Which are the government
buildings?

(Pages 75-80)

1. Over the water is a springboard. The _____ (spring, size) of the board makes it go down at the end where the boy is.
2. That is a _____ (ball, black) in the air between the two men.
3. Because of the _____ (attraction, wind) between the ball and the earth, the ball will come down.
4. The boy is putting his full _____ (weight, fire) on the springboard.
5. The girl is making something good over the _____ (fire, first).

(Pages 75-80)

greater nearer nearest farthest

1. The water is _____ to the house than the mountains.
2. The trees are the _____ of all to the house.
3. The mountains are the _____ of all from the house.
4. The distance from the mountains to the house is _____ than the distance from the trees to the house.

(Pages 75-80)

Here are three women. They are of different _____ (sizes, springs). The one with the dog is _____ (small, smaller) than the one with the _____ (cord, stick). But she is not as _____ (small, smaller) as the woman with the book. From left to right, the woman with the books is _____ (first, last); the woman with the dog is in the _____ (middle, end) and the woman with the stick is _____ (first, last).

(Pages 81-89)

statement writer metre watch

1. Writing is the work of a person who is a _____.
2. A _____ is a measure of distance which is a little longer than a yard.
3. A _____ is a very small clock which one may put in one's pocket or on one's wrist (lower arm).
4. "All men are equal" is a _____.

(Pages 81-89)

mind colder hanging square blows motion

1. This man is getting the right answer. He is writing the numbers with a pen, but he is doing a great part of the work with his mind.

2. This man is _____ by his hands.

3. One picture is in a round frame. The other picture is in a _____ one.

(Pages 81-89)

4. This man gave his coat to the woman because she was cold. Now he is _____ than he was before, but he keeps saying that he is not cold.

5. He did not get on the bus because the bus was in _____.

6. This rock is broken because the man gave it a number of _____ with his hammer.

(Pages 81-89)

one twenty-fifth science

pull idea if

1. Men and women of _____ are learning new things about the earth every day.
2. When a person makes a picture of a ship, he has an _____ in his mind of what a ship is like.
3. There are twenty-five fours in one hundred. Four is _____ of a hundred.
4. Wind takes seeds from plants up into the air. When there is no more wind, the _____ of the earth makes the seeds come down again.
5. _____ the number of persons on the earth keeps getting greater and greater, some day there will not be enough room for all.

(Pages 81-89)

cause motion rest effect true false

1. The apples coming down off the branch are in _____.
2. The apples round the boy's feet are at _____.
3. The _____ of the branch's motion is the boy's shaking it.
4. The _____ of the boy's shaking the branch is its motion.
5. This is a _____ statement about the picture: There are more apples round the boy's feet than on the branches.
6. This is a _____ statement about the picture: The shaking made the apples come off.

(Pages 81-89)

Give answers to these questions.

1. Inches and feet are measures of distance. What is a measure of weight?

2. What part of four pounds is one pound?

3. Here is a statement in numbers: " $3 \times 4 = 12$." What is this statement in words?

4. What is an instrument for measuring weight?

5. What is the measure of distance which light goes in one year?

(Pages 93-98)

Every day we get weather news. This news comes to us from weather stations. A weather station is a place where there are different weather instruments. Here are some of these instruments:

1. This is an instrument for measuring heat. It says how warm or cold the air is. When the air is cold, the liquid in the instrument comes down. When the air is warm, it goes up.

2. This is an instrument for measuring the weight of the air. Galileo was the first person who made the discovery that air has weight. Warm air goes up because it has less weight than cold air.

(Pages 93-98)

3. This is an instrument for measuring amounts of rain. A place which gets less than ten inches of rain in a year has a low rainfall. There are places which get as much as 450 inches of rain in a year.

4. This is an instrument which says how strong the wind is. When the wind is blowing at ten miles an hour, it is not a strong wind. A wind of fifty miles an hour is a very strong wind. There are times when the wind goes more than a hundred miles an hour.

5. This is an instrument which gives the direction from which the wind is blowing. In the United States, the north wind is a cold wind and the south wind is a warm wind.

(Pages 93-98)

discovery only blowing less
drops weather worse amount

1. Galileo made the _____ that air has weight.
2. Changes in the weather do not have one cause _____.
3. A wind which is _____ at fifty miles an hour is a very strong wind.
4. A place which gets _____ than ten inches of rain in a year is very dry.
5. When it is raining, water comes down in _____ from the clouds.
6. When we get a number of wet, cold days, we say, "We are having bad _____."
7. In the north of the United States the winters are _____ than they are in the south.
8. The rainfall of a place is the _____ of rain the place gets in a year.

(Pages 99-101)

1. When we see

and fire coming out of a house, we say, "It is on

fire." If the _____ are very high and the

_____ is very thick, it is a bad fire.

2. The _____ of an airplane and the

_____ of a ship are different sorts of

_____.

(Pages 99-101)

3. When a person with a great number of bags gets

off a train, a man with a

_____ takes his

_____ into the station for him.

4. In 1910 women had long

_____ and in 1920 they

had _____ ones.

5.  _____ and

_____ are good food for

_____.

(Page 99)

Make changes like the change in 1 for statements 2-6.

1. Why did he give his watch to you?

Why did he give you his watch?

2. I am very happy because he sent some flowers to me.

3. My father says that if I keep my room clean, he will give his old watch to me.

4. Don't get off the bus before giving some money to me.

5. He is writing a letter to Mother.

6. Did you give an answer to the girl?

(Pages 80-99)

1. When science _____ (puts, sends) a person on the moon, every newspaper has the story.
2. Getting ready for a journey to the moon _____ (puts, takes) time.
3. The moon _____ (gets, makes) its light from the sun.
4. The sun _____ (does, gives) light and heat to the earth.
5. Light _____ comes, puts) to the earth from the sun in about eight minutes.
6. The nearest star _____ (makes, sends) its light to the earth, but its heat does not get to us.
7. A falling star _____ (makes, does) a line of light across the sky.
8. The discovery of new stars _____ (goes, takes) on all the time.

(Pages 99-102)

This is a _____ of cloth. There are different sorts of cloth. Cotton cloth comes from the _____ plant. It is of great use in making clothing for summer. Wool comes from _____ It is soft and warm and makes good winter _____. Silk comes from _____. It makes a soft cloth which is _____ than cotton but not as warm as _____.

(Pages 99-102)

In making cloth from wool,

Step one is cutting the wool off
the sheep.

Step two is _____.

Step three is _____.

Step four is _____.

Step five is _____.

washing and drying the wool
putting the threads on a frame
making the threads into cloth
cutting the wool off the sheep
twisting the wool into threads

(Pages 99-102)

twists across silk warmer use

1. Mountain roads have a great number of _____ and turns in them.
2. Some roads go _____ the United States from east to west and are over 3000 miles long.
3. When it is winter in the north, the sea there is _____ than the land.
4. A great amount of _____ comes from China and Japan.
5. A cart with one wheel off is of no _____.

(Pages 103-107)

rays herself point
seems seemed looking-glass

1. Here is a straight road. It _____ to come to a _____ in the distance. Were you ever on a road which _____ to come together like this?

2. This woman is in a store putting on hats. She sees _____ in a long mirror. A mirror is a _____.

3. The sun's _____ give us more heat in the middle of the day than they do in the morning.

(Pages 108-112)

Give questions for these answers. Put the right words on the lines in the answers.

1. Question: What does he have his
foot on?

Answer: He has his foot on a spade.

2. Question: What _____
_____?

Answer: She is _____ with her needle.

(Pages 108-112)

3. Question: Who _____
_____?

Answer: A _____ makes use of a plow.
His work is _____. His fields and
buildings are his _____.

4. Question: Is _____
_____?

Answer: Yes, the man is _____ his
_____ to get it ready for putting in seeds.

(Pages 108-112)

5. Question: What _____
_____?

Answer: He makes _____ and shoes for
a living. He is a _____.

6. Question: What _____
_____?

Answer: He has his _____ in one
hand and his _____ in the other. He is
a _____.

(Pages 108-112)

7. Question: What _____
_____?

Answer: Housekeeping is her work. She is
a _____.

8. Question: What sort _____
_____?

Answer: He has a clothing store. He is a
_____.

(Pages 108-112)

9. Question: Where _____
_____?

Answer: This man goes to work in a bank every
day. His work is _____.

10. Question: What _____
_____?

Answer: This businessman is keeping accounts for
his _____.

(Pages 109-110)

Gary Gill took a _____ (direction, look) outside his door to see if he had a letter. He did. It was a statement from his _____ (bank, bent), saying that he had. \$2,568.07 in his _____ (account, amount).

"That money will not be there long," he said to himself. "There are _____ (important, addition) things for me to do with it. Part of it will go for my schooling," He put the letter in his _____ (pocket, middle)

STATE OF TEXAS

and put his coat on to go to a bookstore.

At the bookstore he got three books with paper covers for his schoolwork. The _____ (rest, prices) of the books were \$9.50, \$11.95, and \$14.25. The storekeeper put the numbers down on some paper like this:

$$\begin{array}{r}
 \$ 9.50 \\
 11.95 \\
 \underline{14.25} \\
 36.30
 \end{array}$$

(Pages 109-110)

Gary saw the _____ (numbers, needles) and said, "is your _____ (addition, question) right? I get a different answer."

The man did it again. "Your answer is right," he said. "it is 60 _____ (cents, solids) less."

Then Gary said, "I don't have enough money with me. May I give you a _____ (check, change)?"

"Yes, if you have something with your name on it," said the man.

"Here is something," said Gary, pulling out his bank-book and opening it. Then he took his checkbook and made out a check for the right amount.

(Pages 111-123)

1. Talking to different sorts of men and women is part of Alfred's work _____ (as, of) a newspaper man.
2. I got the name of your store _____ (by, through) Ms. Stone.
3. Those pictures seem _____ (to, with) me to be by the same painter.
4. How are you able to see _____ (by, with) your hat over your eyes like that?

(Pages 113-123)

Give short answers to these questions:

1. Which sort of drink does a person put sugar in, a sweet drink or a bitter one?

A bitter one

2. Which is more like bread—cake or butter?
-

3. Which is one of our five senses—touching or changing?
-

4. Which powder comes from mines in the earth—salt or sugar?
-

5. Which sense gives us knowledge of how soft or hard a thing is—smelling or touching?
-

6. Which part of your mouth is soft—your lips or your teeth?
-

(Pages 113-123)

1. There are boards _____ (across, through) the window.

2. They are looking _____ (at, in) opposite directions.

3. He has a plate of warm soup _____ (before, with) him.

4. Mary's dress is very long. The woman will take it _____ (up, off) with a needle and thread.

5. The roots of some plants have sugar _____ (in, under) them.

(Pages 114-122)

Put the right words on the right line.

1. We put sugar on food _____

2. A thing may seem strange _____

3. We are able _____

4. The two sides of a road seem _____

5. An automobile is of great use _____

to us when our house is far from our work.

to give it a sweet taste.

to come together in the distance.

to us if we have no knowledge of it.

to make mines which go deep down into the earth.

(Pages 114-124)

Put these words on the right line.

The grass

The glasses

The garden

Her fingernails

The sweet smell

The top

1. _____ is up to his knees.
2. _____ is full of flowers.
3. _____ of the flowers is the cause of her smile.
4. _____ are doing the work of scissors.
5. _____ are on top of the books.
6. _____ of this mountain has a cover of snow.

(Pages 114-124)

touch reading tasting hearing
smell seeing talking

1. Through _____ food we are able to say if it is sweet or bitter or warm or cold.
2. Of the "five senses" _____ gives us the greatest knowledge of our world.
3. The sense of _____ may be more important to a dog than to a man.
4. Through _____ books and newspapers we are able to get an idea of what is going on in the world.
5. It is chiefly our senses of seeing and of _____ that give us knowledge of the size of something.
6. Through our senses of seeing and _____ we get a knowledge of words and their uses.
7. Through writing and _____ we are able to say what our ideas are.

(Page 125)

It is one of the first days of spring. The bright _____ (red, yellow) sun is high in the sky. The sky is _____ (blue, gray). Those men and women with rooms on this side of the building get the morning

sun through their windows. But very little sunlight comes to the lower parts of the building. Here it is dark most of the day, and there is a little bit of snow. When it first came down it was _____ (white, black), but now it is a dirty _____ (gray, red) from the smoke of the buildings nearby.

Under one of the windows is a flowerbox which gets enough sun for flowers to come up. The woman who has this room put some spring flower seeds in the window box one day, and now the young plants are coming up out of the earth. The flowers are different _____ (collars, colors), but their leaves are all _____ (green, blue). Some of the flowers are yellow and some _____ (red, green) like the color of the woman's lips.

(Pages 126-136)

1. Is the book on the higher shelf?

No, it isn't.

2. Is the mine on the left the deeper?

3. Is the boy on one of the lower branches?

(Pages 126-136)

4. Is the girl in the middle taller than the other two?

5. Is the man on the right thinner than the one on the left?

6. Does the girl have shorter hair than the boy?

(Pages 126-136)

deeper longer taller lower

1. Is the lower board
_____ than
the other one?
No, it isn't.

2. Is the middle of a river
_____ than
its sides?
Yes, it is.

3. Is the woman than
_____ the man?
No, she isn't.

4. Is the 2nd note
_____ than
the 1st?
No, it isn't.

(Pages 127-132)

gun whistle kettle bucket
sound noise

1. The sound of a _____ may be very high.
2. It is not good to have a bedroom facing a street in which there is a great amount of _____.
3. A _____ is good for heating water in and a _____ for taking it from one place to another.
4. The _____ of music gives pleasure to a great number of us.
5. A _____ makes a louder noise than a pocket whistle.

(Pages 129-149)

This animal is a bat. It is able to go through the air not only in the daytime but at night as well, when there is

no light at all. How does it do this and keep clear of trees and houses? We didn't have the answer to this question before 1793. Then a man by the name of Spallanzani got the idea that it was not the bats' eyes but their ears that made them able to go about in the dark. To see if this was true, he took the sense of hearing from a number of bats. When he did this, the bats were not able to keep from going into things. This made it clear that their hearing was the most important sense to bats in motion. But others at that time gave no thought to what Spallanzani said. It took years for others to see that his statements about bats' hearing were true.

Bats make thin, high, short noises, sending sound waves through the air which may be turned back by a tree or a wall or anything in front of them. Sound waves coming back to the bat's ear give the bat knowledge of when something is in front of it and how far away the thing is.

(Pages 129-149)

As a bat gets nearer to what is in its way, the sound waves the bat sends out come back to it more quickly. Then the bat makes a change in its direction. This is how it keeps clear of things, on the darkest nights as well as on the brightest days.

1. What sense is very important to a bat?

2. Does the bat make use of this sense only in the daytime?

3. What does the bat send out as it goes through the air?

4. What gives the bat knowledge of when something is in front of it and how far the bat is from it?

(Page 130)

myself yourself himself herself
itself ourselves yourselves themselves

1. When the summer is over we are the only family on the island. For nine months we are by _____.
2. She made all of the dress _____.
3. Before long, a young bird is able to get its food for _____.
4. John, are you going by _____ or are you taking your brother with you?
5. I see _____ in the looking glass every morning.
6. They kept _____ dry by putting on great boots, raincoats, and rainhats.
7. If you and Peter don't do the work now when I am here to do it with you, you will have to do it by _____.
8. He seemed to be talking to _____, but then I saw there was another person with him.

(Pages 130-132)

It was a warm summer day. After working hard in his garden, Mr. Wood was resting in his bedroom when a very loud hammering noise came through an open window. "What on earth is that!" he said. The noise was coming from a bird which was making a hole in a tree not far from the window. "Oh, no!" said Mr. Wood when it became clear to him what the noise was. But he didn't get up at first. Waiting for the bird to get through seemed the only thing to do. However, the hammering kept on. At last Mr. Wood, with his eyes only half open, got up and said to himself, "I'm going to put a stop to that noise!" He went over to the window and put it down very hard, making a noise louder than the hammering of the bird. "Oh, what did I do!" said Mr. Wood, seeing bits of glass and wood on the floor round him. "The window is broken now. And all because of that bird!" After a short time there was again the sound of hammering. Was it the bird? No, this time it was Mr. Wood himself, putting the parts of the window frame together again.

(Pages 130-132)

1. What was Mr. Wood doing before he went to the window?

2. Why didn't he get up at first?

3. What made him go to the window?

4. Was he talking to the bird?

5. When did the window in Mr. Wood's bedroom get broken?

(Pages 132-149)

1. A man who is putting two bits of wood together with nails is _____ them together.
2. When he gives blows to the nails with a hammer, he is _____ them into the wood.
3. Today, most persons say that _____ has bad effects upon the body.
4. _____ has a good effect upon the body; it makes the body stronger.
5. When we are _____ the sun, we sometimes have to put dark glasses on or keep our eyes shut.
6. In winter, _____ ourselves by an open fire gives us a good feeling.
7. When a farmer is plowing, he is _____ up the earth with a plow.

(Pages 133-135)

Put "true" before the statements that are true, "false" before those that are false.

- true 1. The man is seated on the bucket.
2. The monkey is at the man's feet.
3. The boy is getting a whistle from the man.
4. There is a cord fixed to the monkey's collar.
5. Water is in the bucket.
6. The monkey's tail is straight.
7. The monkey has his arm round the man's neck.
8. The boy has short trousers on.

(Pages 133-136)

This _____ (note, song) has four parts.
The two top parts are for women and young boys.
The two lower parts are for men.

Some songs have more than four parts. But no
_____ (notes, songs) have the number
of parts that _____ (music, notes) for
instruments may have. _____ (Music, Notes)
for instruments may have up to twenty different parts
when different instruments are in use together. Here is
an instrument which gives us the highest _____
(notes, songs) of all.

Here is an instrument which gives us the lowest
_____ (notes, music) there are.

(Pages 134-149)

1. One way of getting apples from a tree is by giving the tree a _____.
2. Not every boy or girl does good _____ in school.
3. Taking only a quick _____ at the pages of a book will not give us as much knowledge of it as reading it through will.
4. Taking a _____ in the sea is a pleasure to some of us on a very warm day.
5. Giving an open door a soft _____ with the fingers will not put it into motion, but giving it a push will.

(Pages 135-138)

worst lowest highest least best most

We three all had the same number of apples this morning. Now at the end of the day, there are no apples here. Mrs. Visconti got a higher price for her apples than Mr. Grassino did for his, and he got a higher price for his than I did for my apples. Mrs. Visconti got the _____ price and I got the _____ price. A higher price gives you more money. Mrs. Visconti got the _____ money for her apples and I got the _____ for my apples. And if the higher price is the better price, she got the _____ price and I got the _____ one.

(Pages 140-148)

After every line in these statements is a word. Put the opposite of that word on the line.

1. It is a pleasure (pain) to see something beautiful.
2. We say that the sea is _____ (smooth) when we see a great number of high waves in it.
3. Whenever there is a great amount of wind and rain, a journey in an airplane may be far from _____ (rough).
4. It is no pleasure to be with a person who is _____ (happy) most of the time.
5. A baby's way of saying that he is happy is by _____ (crying) or giving those round him a smile.
6. When Copernicus said that the earth goes round the sun, some men of the church said his statement was _____ (true).
7. Monkeys have _____ (less) brains than goats.

(Pages 143-149)

PICTURE A

PICTURE B

(Pages 143-149)

Put the letter A before a statement about Picture A,
B before a statement about Picture B.

- _____ A _____ 1. The man is swimming.
- _____ 2. The water is a little rough.
- _____ 3. He is in the water.
- _____ 4. He has a cat with him.
- _____ 5. The water is smooth.
- _____ 6. He is not facing the water.
- _____ 7. The man is warming himself
in the sun.
- _____ 8. He is at the seaside.
- _____ 9. He has a dog with him.
- _____ 10. He is on the sand.
- _____ 11. He is not at the seaside.
- _____ 12. He is taking a swim.
- _____ 13. It is not certain that he is
a swimmer.
- _____ 14. He is not taking a swim.
- _____ 15. It is certain that he is a swimmer.

(Pages 143-149)

Put a line under the words that make a statement true.

1. If A is equal to B and B is equal to C, (then A is equal to C) (then A is not equal to C).
2. If a person goes on with his education, (he does not put a stop to it) (he puts a stop to it).
3. When a person says that something is beautiful, (it is certain that the thing is beautiful) (it is not certain that the thing is beautiful) because there is no measure of the beautiful.
4. If an animal has an attraction for a small boy, (the animal has a desire for the boy) (the boy has a desire for the animal).
5. If a person is facing you, (he has his back to you) (he does not have his back to you).

(Page 153)

thoughts wash laugh

1. There is _____ that a man will be sent to Mars before 2010.
2. Most boys in school do not keep their _____ on their work all the time.
3. It is important that we have a certain amount of _____ every night.
4. A cat gives itself a _____ with its tongue.
5. Most of the time the sound of a _____ is a happy sound.
6. The _____ at which the earth is turning round is said to be slower than before.
7. It is important that we have _____ of ourselves and of others.

(Pages 143-154)

After hearing a _____ (cry, laugh) from her daughter, Mrs. Smith went to see what was _____ (right, wrong). From the _____ (doorway, window) of the house, she was able to get a _____ (happier, clearer) idea of what was going on outside. Her daughter and a little boy were at _____ (work, play) when the girl had a _____ (blow, fall) from the boy's cart. When she saw her mother, the girl kept on _____ (crying, laughing), pointing to the cart at the same time. "So that's how you had the fall," the mother said. "Tom, take the cart _____ (away, up)," she said to the boy. And then she took her daughter into the house.

(Pages 154-156)

1. Dressmakers make clothing of all sorts.

Clothing *of all sorts is made*
by dressmakers.

2. Mary let the cat out of the house.

The cat _____

3. The government will give money to a great number of schools in the coming year.

Money _____

4. The sun sends out light in every direction.

Light _____

5. Sometimes birds take seeds from the earth.

Seeds _____

(Pages 154-156)

6. Tom put the book there.

The books _____

7. The work which a teacher does has no end.

The work _____

8. "To be or not to be. That is the question." Hamlet, a person in a play by Shakespeare, said these words.

These words _____

9. Putting milk in an icebox keeps it good.

Milk _____

10. Every year a great number of persons see the painting "Mona Lisa."

The painting "Mona Lisa" _____

ANSWERS

The first number indicates the page of the workbook on which the questions appear. The number in parentheses refers to the pages in *English Through Pictures, Book II*, which these exercises support.
